M.E.S.COLLEGE OF ARTS AND COMMERCE, ZUARINAGAR, GOA

ICT ENABLED TOOLS

- Information and Communications Technology (ICT) enables the teaching learning process to be effective only when teachers integrate it into the curriculum through different means.

- Teachers use a diverse set of ICT tools to communicate, create, disseminate, store, and manage information.

- Teachers use various means to integrate ICT into teaching learning process which is user friendly and accessible to all the students. ICT tools such as laptops, desktops, LCD projectors and speakers are being used by the teachers in the teaching learning process to make it more interactive and effective to the audio learners, visual learners and the audio-visual learners.

- Some of the innovative e-resources which are being used by the teachers are MOOC, Inflibnet, e-PG Pathshala, NList, Flipped classroom and YouTube.

- The teachers make use of google classroom. With this method of teaching, teachers can create classes, distribute assignments, grade and send feedback, and see everything in one place.

- Videos related to subject matter are shown to students, followed by a discussion of the same. In language courses, word games are organized using Microsoft office word and students are also encouraged to use blogs.

- The commerce students, as part of their curriculum on Modern Communication Skills, make short two-minute video documentaries titled Digital Story Telling and present them to the class with background music and commentary.

- Under Management Information System, the Learning Management System (LMS) module is enabled to provide an online platform for teachers and students to interact. Online assignments, quiz, discussion forums and reading material are designed by the faculty members.
