**REPORT ON THE NATIONAL CONFERENCE ORGANIZED BY THE
DEPARTMENT OF PSYCHOLOGY (2018-19)**

The two day ICSSR sponsored National Conference on **‘Enhancing Mental Health Across the Life Span: Issues, Challenges and Interventions’** organized by the Psychology Department of M.E.S College of Arts & Commerce, Zuarinagar, Goa was held on the 1st and 2nd March 2019 at Ravindra Bhavan, Baina-Vasco. The convenor of the National Conference was Asst. Prof. Cedila Pereira e Gomes. Principal Dr R.B. Patil welcomed the gathering, Asst. Prof. Cedila Pereira e Gomes introduced the theme of the conference, Dr. Freda Pereira introduced the dignitaries of inaugural function and Asst. Prof. Sweta Matonkar proposed the vote of thanks.

The Chief Guest for the inaugural function was Dr Richard Velleman, an Emeritus Professor, of Mental Health Research, University of Bath, UK. He emphasized the importance of encouraging mental health, across the lifespan, about creating a focus on health, not illness or disability or problems. According to him, there are many factors in young people’s lives which increase the risk that things will go wrong for them such problems in their families (e.g alcohol, violence), problems with their friends (getting into the wrong company, trying alcohol or drugs, especially at a young age) and problems in their society (inequality, poverty, discrimination). He also emphasized the fact that family and Individual/Community factors increase the chances of a healthy adolescence with attachment and Security being the key elements that lead to resilience. He also stressed on 5 key things that can impact on our mental health as move into old age such as participation in meaningful activities, retaining or developing relationships, physical health, poverty and discrimination.

Emeritus Professor of Mental Health Research, University of Bath, UK lighting the traditional lamp at the National Conference on ‘Enhancing Mental Health Throughout the Life Span: Issues, Challenges and Interventions’

Address by the Keynote Speaker- Dr. Suchita Kochargaonkar, Principal, Bhonsala Military College, Nashik. According to her, many factors contribute to mental health problems, such as biological factors, life experiences, family history of mental health problems and various circumstances of life e.g. Death or profound illness. She felt that we need to respond to the early warning signs of a mental health problem. She also emphasized that neuropsychiatric disorders are among the leading causes of worldwide disability in young people. She also cited the common mental health disorders such as anxiety disorders, behavioral disorders, eating disorders, mental health and substance use disorders, mood disorders, obsessive-compulsive disorder, personality disorders, psychotic disorders, suicidal behavior, trauma and stress related

disorders and social media related disorder. She also highlighted the essence of positive mental health and wellness and the issues and challenges of mental health in India.
