# M.E.S.COLLEGE OF ARTS AND COMMERCE, ZUARINAGAR, GOA
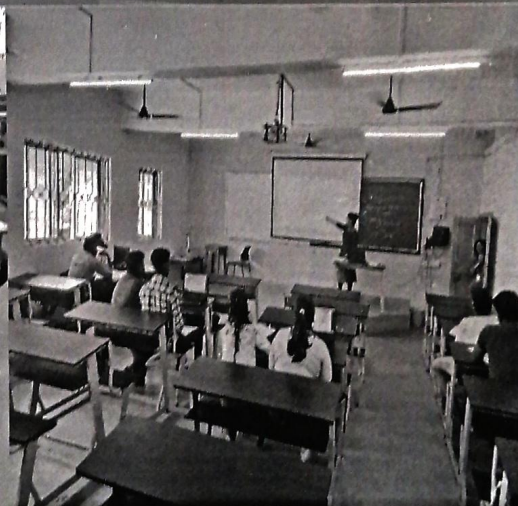

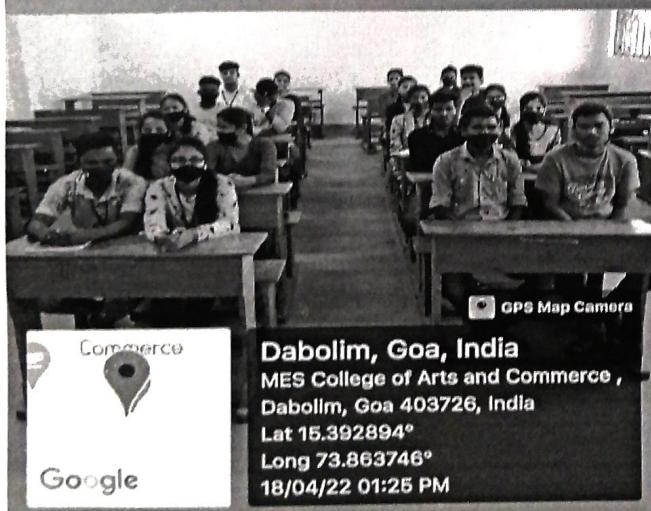

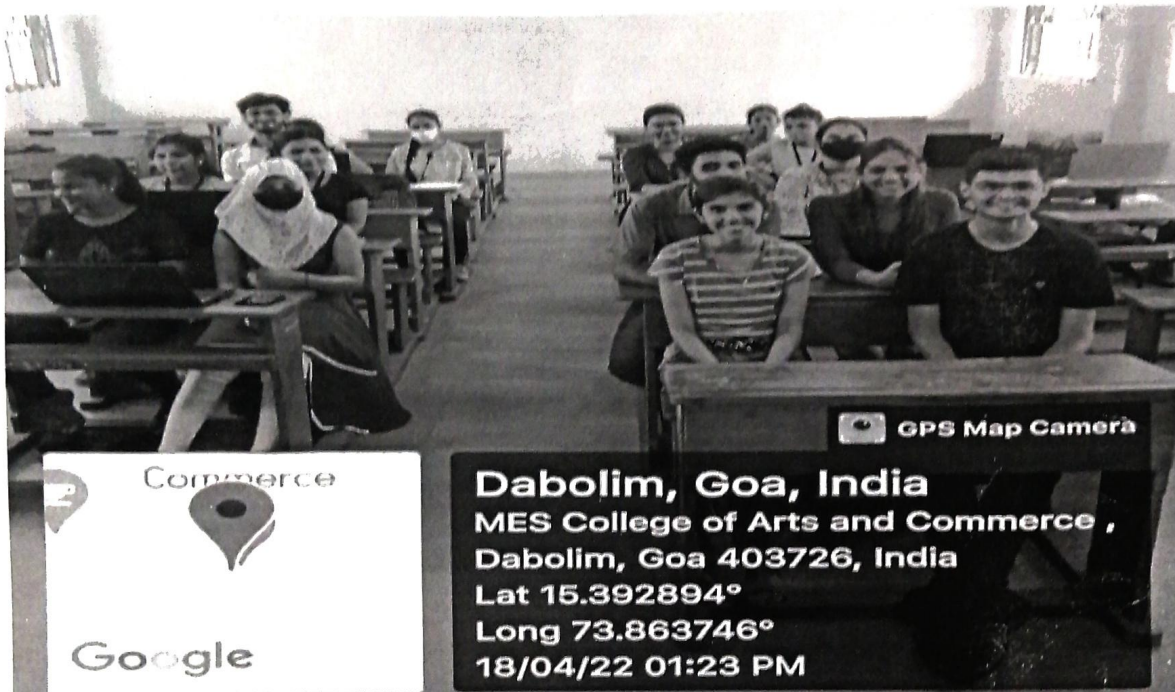

ACADEMIC YEAR 2021-2022

ICT ENABLED TOOLS

• Only when teachers successfully incorporate information and communications technology (ICT) into the curriculum can the teaching and learning process be effective.

• Teachers communicate, create, distribute, save, and manage information using a variety of ICT tools.

• Teachers employ a variety of techniques to incorporate ICT into the teaching and learning process so that it is user-friendly and open to all pupils. To make the teaching and learning process more dynamic and successful for the audio learners, visual learners, and audio-visual learners, teachers use ICT technologies including computers, desktops, LCD projectors, and speakers.

• Google Meet is used by teachers to conduct classes online using the Gsuite platform. Assignments are given out and received via email and Google Classroom. Students receive study materials via Google Classroom, email, and WhatsApp. Additionally, sessions on trending topics in a variety of fields are conducted via the Zoom platform.

• The professors use a variety of cutting-edge online resources, including MOOCs, Inflibnet, e-PG Pathshala, NList, flipped classrooms, and YouTube.

• Google Classroom is used by the instructors. With this approach to instruction, teachers may set up classrooms, give tasks, grade them, send comments, and keep track of everything in one location.

• Students watch videos pertaining to the topic matter, and then they debate on it. In language classes, word games are set up using Microsoft Office Word, and blogging is also encouraged.

• As part of their coursework for Modern Communication Skills, the commerce students create brief, two-minute video documentaries named Digital Story Telling, which they then share with the class while playing music and providing commentary.

• The Learning Management System (LMS) module of the Management Information System is enabled to give professors and students an online forum for communication. The faculty members create the online assignments, tests, forums, and reading materials.
