

Programme-specific outcomes

Economics Honors Programme

PSO-1: To cultivate a robust understanding of fundamental concepts in economics, focusing on both

microeconomics and macroeconomics.

PSO-2: To develop proficiency in quantitative techniques, encompassing statistical analysis,

econometrics, and data interpretation.

PSO-3: To critically evaluate the effectiveness and consequences of economic policies enacted at the

local, national, and global levels.

PSO-4: To develop the ability to apply economic principles and theories to address current economic

challenges such as poverty, inequality, environmental sustainability, inflation, unemployment, and

global trade.

PSO-5: To gain the necessary skills to design, conduct, and present independent economic research.

PSO-6: To develop an awareness of global economic issues, such as international trade, globalization,

economic integration, and cross-border finance.
