Date: 10.12.2024

CIRCULAR

Ref: GU/Acad –PG/BoS -NEP/2024/151 dated 27.05.2024

In supersession to the above referred Circular, the Syllabus of the **Bachelor of Arts in Psychology** Programme is attached with following changes:

1. Included list of Courses offered under the Double Major.
2. Number of Credits for Course PSY-221 'SPORTS PSYCHOLOGY' shall be 3 Theory +1 Practical instead of 4 Theory.
3. Added Exit Course for Semester IV PSY-261 'LIFESKILLS FOR YOUTH WELLBEING'.

The Dean/ Vice-Deans of the D.D. Kosambi School of Social Sciences and Behavioural Studies and Principals of the Affiliated Colleges offering the **Bachelor of Arts in Psychology** Programme are requested to take note of the above and bring the contents of the Circular to the notice of all concerned.

(Ashwin V. Lawande)
Deputy Registrar – Academic

To,

1. The Dean, D.D. Kosambi School of Social Sciences and Behavioural Studies, Goa University.
2. The Vice-Deans, D.D. Kosambi School of Social Sciences and Behavioural Studies, Goa University.
2. The Principals of Affiliated Colleges offering the Bachelor of Arts in Psychology Programme.

Copy to:

1. The Director, Directorate of Higher Education, Govt. of Goa
2. The Chairperson, BOS in Psychology.
3. The Controller of Examinations, Goa University.
4. The Assistant Registrar, UG Examinations, Goa University.
5. Directorate of Internal Quality Assurance, Goa University for uploading the Syllabus on the University website.

Programme Structure for Semester I to VIII Under Graduate Programme- Psychology

Semester	Major -Core	Minor	MC	AEC	SEC	I	D	VAC	Total Credits	Exit
I	PSY 1-100 ESSENTIALS OF PSYCHOLOGY (3T+1P)	PSY-111 CHILD PSYCHOLOGY (4)	PSY-131 PSYCHOLOGY OF ADJUSTMENT (3)		PSY-141 PERSONALITY DEVELOPMENT (1T+2P)					
II			PSY-132 ENVIRONMENTAL PSYCHOLOGY (3)		PSY-142 STRESS MANAGEMENT (1T+2P)					PSY-161 Mindfulness (2+2)
III	PSY-200 ATTITUDES AND SOCIAL COGNITION (3T+1P) PSY-201 HEALTH PSYCHOLOGY (4)	PSY-211 ADOLESCENT PSYCHOLOGY (4)	PSY-231 RELATIONSHIP PSYCHOLOGY (3)		PSY-241 DEVELOPING PSYCHOLOGICAL SKILLS (1T+2P)					

IV	<p>PSY-202 SOCIAL INFLUENCE AND GROUP PROCESSES (3T+1P)</p> <p>PSY-203 POSITIVE PSYCHOLOGY (4)</p> <p>PSY-204 HUMAN FACTORS AT WORK (4)</p> <p>PSY-205 PSYCHOLOGY OF AGING (2)</p>	<p>PSY-221 SPORTS PSYCHOLOGY (4)</p>						<p>PSY-261 LIFE-SKILLS FOR YOUTH WELL- BEING (4)</p>
V	<p>PSY-300 PSYCHOLOGICAL TEST AND MEASUREMENTS (3T+1P)</p>	<p>PSY-321 QUALITATIVE DATA ANALYSIS (4)</p>		<p>PSY-361 INTERNSHIP (2)</p>				

	<p>PSY-301 COUNSELLING PSYCHOLOGY (4)</p> <p>PSY-302 ABNORMAL PSYCHOLOGY (4)</p> <p>PSY-303 RESEARCH METHODOLOGY (2)</p>							
VI	<p>PSY-304 COGNITIVE PSYCHOLOGY (3T+1P)</p> <p>PSY-305 STATISTICS FOR PSYCHOLOGY (4)</p> <p>PSY-306 CRIMINAL PSYCHOLOGY (4)</p>	<p>PSY-322 EDUCATIONAL PSYCHOLOGY (4)</p>						

	PSY-307 PROJECT (4)							
VII	PSY-400 PSYCHOMETRICS (3T+1P) PSY-401 PRACTICUM: EXPERIMENTS AND TESTS (4) PSY-402 PSYCHO- PATHOLOGY (4) PSY-403 COUNSELLING ACROSS LIFE SPAN (4)	PSY-411 APPLIED POSITIVE PSYCHOLOGY: INTERVENTIONS (4)						
VIII	PSY-404 SUPERVISED PRACTICUM (4)	PSY-412 NEURO- PSYCHOLOGY (4)						

	PSY-405 PSYCHOTHERAPIES (4) PSY-406 HUMAN RESOURCE MANAGEMENT (4) PSY-407 PSYCHOSOCIAL REHABILITATION (4)									
--	--	--	--	--	--	--	--	--	--	--

Program Specific Outcomes:

Students will be able to:

1. Explain and validate psychological theories and concepts effectively
2. Use psychological principles in applied situations and practice.
3. Critically evaluate, and analyze psychological literature, and empirical evidence.
4. Demonstrate research skills including research methods, experimental designs, and data analysis, and understand ethical principles in psychological research and practice

Number of Courses for Colleges opting for 60% for Double Major in psychology

Sem III

Major- PSY 200 ATTITUDES AND SOCIAL COGNITION (3+1 credits)

Sem IV

- Major- PSY 202 SOCIAL INFLUENCE AND GROUP PROCESSES (3+1 credits)
- Major- PSY 203 POSITIVE PSYCHOLOGY (4 credits)
- Major- PSY 205 PSYCHOLOGY OF AGING (2 credits)

Sem V

- Major-PSY 300 PSYCHOLOGICAL TEST AND MEASUREMENTS (3+1 credits)
- Major- PSY 302 ABNORMAL PSYCHOLOGY (4 credits)
- Major- PSY 303 RESEARCH METHODOLOGY (2 credits)

Sem VI

- Major- PSY 304 COGNITIVE PSYCHOLOGY (3+1 credits)
- Major- PSY 307 PROJECT (4 credits)

Sem VII

- Major-PSY402 PSYCHOPATHOLOGY (4 credits)
- Major- PSY403 COUNSELLING ACROSS LIFESPAN (4 credits)

Sem VIII

- Major-PSY 406 HUMAN RESOURCE MANAGEMENT (4 credits)
- Major- PSY 405 PSYCHOTHERAPIES (4 credits)

Number of Courses for Colleges opting for 40% for Double Major in Psychology

Sem III

- Major- PSY 200 ATTITUDES AND SOCIAL COGNITION (3+1 credits)

Sem IV

- Major- PSY 202 SOCIAL INFLUENCE AND GROUP PROCESSES (3+1 credits)

Sem V

- Major-- PSY 300 PSYCHOLOGICAL TEST AND MEASUREMENTS (3+1 credits)

Sem VI

- Major- PSY 304 COGNITIVE PSYCHOLOGY (3+1 credits)
- Major- PSY 305 STATISTICS (4 credits)

Sem VII

- Major-PSY402 PSYCHOPATHOLOGY (4 credits)
- Major- PSY403 COUNSELLING ACROSS LIFESPAN (4 credits)

Sem VIII

- Major-PSY 406 HUMAN RESOURCE MANAGEMENT (4 credits)
- Major- PSY 405 PSYCHOTHERAPIES (4 credits)

SEMESTER I & II**Name of the Programme : BA PSYCHOLOGY****Course Code : PSY-100****Title of the Course : ESSENTIALS OF PSYCHOLOGY****Number of Credits : 3+1****Effective from AY : 2023-24**

Pre-requisites for the Course:	Nil	
Course Objectives:	<ol style="list-style-type: none"> 1. Understand the subject of psychology as a science 2. Understand psychological processes and conduct basic experiments in psychology. 3. Develop knowledge of cognitive processes 	
Content:		No of Hours
	CHAPTER I: NATURE OF PSYCHOLOGY <ol style="list-style-type: none"> 1. Psychology as a Science: Beginnings of psychology as a science, scientific way of thinking, Scientific method. 2. Applied Psychology & Psychology Careers Psychology as a Career & Mental Health Professionals, Psychology & Work, Psychology Beyond the Classroom, Psychology & Law, Sports Psychology, Psychology in India 3. Contemporary Approaches to Psychology: Behavioral, Psychodynamic, Cognitive, Sociocultural Approaches, Humanistic Movement and Positive Psychology Skilled Based Activities: Interviewing mental health professionals, Field visits to relevant industries to observe the process of appraisal and organizational procedures after which students will have to compile a report.	15
	CHAPTER II: BASIC CONCEPTS OF PSYCHOLOGICAL PROCESSES <ol style="list-style-type: none"> 1. States of consciousness: Normal waking consciousness (Directed consciousness, Flowing consciousness, Divided consciousness), the unconscious mind and altered states of consciousness (Meditation, Hypnosis, Mesmerism, Depersonalization, Near death experiences) 2. Emotions: Nature and types of emotions, expression of emotions (cultural and emotional expressions and labelling) managing negative emotions (management of examination anxiety) and enhancing positive emotions (emotional intelligence) 3. Motivation: Types of motives and Maslow's hierarchy of needs Skill based activities: Maintaining journal of emotions, use of psychological test to understand ones own nature of motivation 	15

	<p>CHAPTER III: BASIC COGNITIVE PROCESSES -1</p> <ol style="list-style-type: none"> 1. Nature of Sensation and Perception: Dimensions of Perception, Mental imagery 2. Learning and memory: Types of learning, Conditioning: Classical and Operant and Observational Learning Memory: Stages of Memory: Encoding, Storage, Retrieval; Methods of Retention: Recall, Recognition, Relearning; Memory enhancement techniques and study habits 3. Problem Solving and reasoning: Trial and error, algorithms, heuristics – Availability heuristic, Representative heuristics Anchoring and adjustment, Escalation of commitment, Emotions and decision making, Naturalistic decision making Reasoning: Deductive and Inductive reasoning, creativity. Skill based activities: Use of mnemonic devices to learn and forming a study habit calendar 	15
	<p>PSYCHOLOGY PRACTICUM</p> <p>Experiments: Any 5 from the list given below</p> <ol style="list-style-type: none"> 1. Learning efficacy of meaningful and meaningless verbal material 2. Comparative study of recall and recognition as tests of retention 3. Fluctuation of attention 4. Optical Illusion: Muller – Lyer 5. Depth Perception 6. Reaction Time 7. Stroop Effect 8. Concept Formation (using cards or blocks) 9. Zeigarnik Effect <p>Psychological Tests : Any 03 from the list given below</p> <ol style="list-style-type: none"> 1. Mobile Phone Addiction Scale (Velayudhan) 2. Bell's Adjustment Inventory-Student form / Global Adjustment Scale 3. Environmental Awareness Ability Measure (Praveen Kumar Jha) 4. DAT or David's Battery of Differential Ability (Verbal Ability) 5. Any Personality Test. 	30
Pedagogy:	<ol style="list-style-type: none"> 1. A blend of traditional teaching techniques- lecturing and problem-based learning may be used in the classroom. 2. The ideas addressed in this course can be better explored through experiential learning tools such as group discussions, role play, debates, flipped learning demonstrations and sharing of experiences, among others, during lectures. 3. Facilitators are also encouraged to use ICT tools such as Power Point Presentations/ Ted talks/documentaries of science to facilitate engagement with syllabus topics.

<p>Course Outcomes:</p>	<p>At the end of this course, the learner will be able to:</p> <ol style="list-style-type: none"> 1. Explain major foundation concepts of psychology 2. Analyse the theoretical perspectives and trends in psychology. 3. Apply scientific methods to experiments, psychological tests and surveys in psychology. 4. Describe psychological principles of various cognitive processes

Name of the Programme : BA PSYCHOLOGY
Course Code : PSY-111
Title of the Course : CHILD PSYCHOLOGY
Number of Credits : 04
Effective from AY : 2023-24

Pre-requisites for the Course:	NIL	
Course Objectives:	1. Understand the role of heredity and environment on development of children. 2. Understand the biological, social and cognitive influences on the development of children 3. Acquaint students with common disorders of childhood and sensitize them to the needs of children with disabilities	
Content:		No of Hours
	CHAPTER 1: PRENATAL DEVELOPMENT AND BIRTH 1 Conception and development before birth a. The course of prenatal development b. Teratology and hazards to Prenatal development 2 Birth a. The birth process b. Methods of child birth c. Assessment and screening at birth 3 Birth complications a. Preterm and Low birth weight infants b. Oxygen Deprivation c. Breech position d. Rh factor e. SIDS	15
	CHAPTER II: PHYSICAL DEVELOPMENT 1. Growth and change a. Physical development b. Brain development: Structure and function, neurons, infancy, early experience and the brain, changing neurons, Childhood 2. Health a. Illness and injuries among children b. Nutrition and eating behaviour 3. Motor development a. Reflexes b. Gross Motor Skills c. Fine Motor skills 4. Sensory and Perceptual development a. Visual Perception	15

	<p>b. Other senses</p> <p>CHAPTER III: COGNITIVE AND SOCIO-EMOTIONAL DEVELOPMENT</p> <ol style="list-style-type: none"> 1. Cognitive development – Jean Piaget’s Theory (Sensorimotor, Preoperational and Concrete Operational Stage) 2. Psychosocial development <ol style="list-style-type: none"> a. Development of emotions b. Self-understanding and Understanding others c. Self-esteem and Self-concept 3. Gender development <ol style="list-style-type: none"> a. Influences on gender development b. Gender stereotypes, similarities and differences 4. Social context of Development <ol style="list-style-type: none"> a. Attachment- Theories; Individual differences in attachment; Caregiving Styles and Attachment b. Parenting styles 5. Peer relations <ol style="list-style-type: none"> a. Exploring peer relationships b. Friendship functions c. Bullying 	15
	<p>CHAPTER IV: CHILDREN WITH SPECIAL NEEDS</p> <ol style="list-style-type: none"> 1 Autism Spectrum Disorders: Symptoms etiology and interventions 2 Specific Learning disabilities: Types (Dyslexia, Dysgraphia, Dyscalculia, Nonverbal Learning disorders, Dyspraxia,) characteristics, etiology and intervention 3 Intellectual disabilities: Classification, etiology and interventions 4 Attention-Deficit Hyperactivity Disorder (ADHD): Characteristics, etiology and treatment 5 Communication disorder: Types (Language disorder, Speech sound disorder, Childhood- onset fluency disorder, social communication disorder), characteristics, etiology and interventions 	15
Pedagogy:	<ol style="list-style-type: none"> 1. A blend of traditional teaching techniques- lecturing and problem-based learning may be used in the classroom. 2. The ideas addressed in this course can be better explored through experiential learning tools such as group discussions, role play, debates, flipped learning demonstrations and sharing of experiences, among others, during lectures. 3. Facilitators are also encouraged to use ICT tools such as Power Point Presentations/ Ted talks/ documentary of science to facilitate engagement with syllabus topics.

Course Outcomes:	<p>At the end of this course, the learner will be able to:</p> <ol style="list-style-type: none"> 1. Identify and understand the meaning of stress. 2. Distinguish methods to control and reduce stress in their daily life. 3. Apply stress management techniques. 4. Explore the relationship between stress, and health 5. Develop a personal stress management plan. 	

EXIT COURSE**Name of the Programme : BA PSYCHOLOGY****Course Code : PSY-161****Title of the Course : MINDFULNESS****Number of Credits : 4 (2+2)****Effective from AY : 2023-24**

Pre-requisites for the Course:	It is considered an exit course in psychology and hence students should meet the criteria for exit with a major paper in psychology	
Course Objectives:	1. Understand the basic principles and concepts of mindfulness 2. Appreciate the connection of mental health and well-being, 3. Develop the ability to be fully present, with attention to the present moment. 4. Learn the skills of mindfulness practices and meditation.	
		No. of Hours
Content:	UNIT1: PRINCIPLES OF MINDFULNESS A: UNDERSTANDING MINDFULNESS <ol style="list-style-type: none"> Definition of mindfulness and its origins Developing mindfulness The benefits of mindfulness Emerging science of mindfulness 	10
	B: MINDFULNESS OF THE BODY AND THOUGHTS <ol style="list-style-type: none"> Introduction to mindful breathing Recognizing and understanding thoughts Cognitive diffusion 	10
	C: MINDFULNESS IN DAILY LIFE <ol style="list-style-type: none"> Importance of gratitude Mindfulness and self-care Mindful communication Mindful technology use 	10
	UNIT 2: PRACTICING MINDFULNESS <ol style="list-style-type: none"> Mindful breathing exercises (Body scan and awareness breathing) Mindful eating and drinking Mindful walking Mindfulness forgiveness Gratitude letters Gratitude practices eg gratitude tree/jar/garden Mindful Journaling Mandala Mindful listening Loving-kindness meditation 	60

	<ul style="list-style-type: none"> • Students have to choose a minimum of 06 activities from the above mindful practices and practice each of them for a minimum of 10 hours each • Evaluation of the student would be based on viva and the ability to demonstrate or teach any one of the above mindful /meditation skills 	
Pedagogy:	<ol style="list-style-type: none"> 1. A blend of traditional teaching techniques, experiential-based exercises and workshops 2. Tools such as group discussions, role play, and sharing of experiences, among others, during interactions. 3. Field trips to nature are encouraged to enhance the mindfulness experience.

Course Outcomes:	<p>At the end of this course, the learner will be able to:</p> <ol style="list-style-type: none"> 1. Understand the basic principles and concepts of mindfulness. 2. Develop the ability to focus their attention on the present moment. 3. Explain the various mindfulness practices in daily activities. 4. Incorporate mindfulness into daily life and maintain a regular mindfulness practice. 	

SEMESTER III**Name of the Programme : BA PSYCHOLOGY****Course code : PSY-200****Title of the Course : ATTITUDES AND SOCIAL COGNITION****Number of Credits : 3T + 1P****Effective from AY : 2024-25**

Pre-requisites for the course	The student should have completed the basic psychology courses in the previous semester.	
Course Objectives:	<ol style="list-style-type: none"> 1. Evaluate the processes of attitude formation. 2. Comprehend the causes of stereotypes. 3. Assess non-verbal communication along with its various channels and understand the concept of impression formation. 	
		No. of Hours
Content:	CHAPTER I: ATTITUDE <ol style="list-style-type: none"> 1. Nature and origin of attitudes 2. Processes of attitude formation: Classical conditioning, Instrumental conditioning, and Observational learning. 3. Emotions and attitude change. 4. The science of persuasion: How attitudes are changed? Persuasion (Communicators, Messages, and Audience), The cognitive processes that underlying persuasion and systematic vs heuristic processing. 5. The power of advertising: How advertising works and Subliminal advertising. 6. Resisting attitudinal / persuasion attempts: Reactance. Forewarning, Selective avoidance, Counterarguing, Individual differences and Ego depletion. 	12
	CHAPTER II: STEREOTYPES, PREJUDICE AND DISCRIMINATION. <ol style="list-style-type: none"> 1. Nature and origins of stereotyping: Defining Prejudice, Cognitive component:(Stereotypes), Affective component: Emotions (Prejudice), and the behavioural component: (Discrimination). 2. Causes of prejudice: Pressures to conform: Normative rules, Social identity theory: US versus THEM (Ethnocentrism, Ingroup bias, Outgroup homogeneity, Blaming the victim and Justifying feelings of entitlement and superiority), and Realistic conflict theory. 3. Techniques for countering /reducing prejudice: Learning not to hate, Benefits of contact, Recategorization, Guilt and prejudice reduction, Saying no to stereotypes and biased attributions and Social influence. (field trip to NGO working with discriminated populations) 	11

	<p>CHAPTER III: SOCIAL COGNITION</p> <ol style="list-style-type: none"> 1. Heuristics and types: Representativeness, Availability, and Anchoring and Adjustment. 2. Schemas: Impact of schemas on social cognition (Attention, encoding and retrieval, Priming and Schema persistence). 3. Sources of error in social cognition: Optimistic bias, Negativity bias and Counterfactual thinking. 4. Non-verbal communication: Basic channels (<i>Facial expressions, Eye contact, Body language and Touching</i>). 5. Theories of attribution: Jones and Davis Correspondent inference theory and Kelley's covariation theory. 6. Basic sources of error in attribution: Correspondence bias, Actor observer effect and Self-serving bias. 	11
	<p>CHAPTER IV: SOCIAL PERCEPTION</p> <ol style="list-style-type: none"> 1. Impression formation: Foundational research on first impressions (Central and peripheral traits), How quickly and accurately are first impressions formed and Can first impressions be changed? 2. Impression management: Tactics for looking good and how well do impression management tactics work? 3. Cognitive dissonance: Theory of cognitive dissonance. 4. Strategies for avoiding dissonance: post-decision dissonance, Illusion of irrevocability hypothesis, justification of effort, Counter-attitudinal behavior, justifying cruelty, justifying our immoral acts, Avoiding temptations and The hypocrisy paradigm. 	11
	<p>PSYCHOLOGY PRACTICUM</p> <p>Experiments: Any 05 from the list given below</p> <ol style="list-style-type: none"> 1. Impression formation 2. Reliability of testimony/Suggestibility 3. Serial position effect in learning 4. Judgement of emotions from facial expressions 5. Word superiority effect (Coglab) 6. Verbal conditioning 7. Bystander effect 8. Conduct an interview (sample size = 5) to study any one of the following: Effect of advertising on consumer behaviour, Tactics of compliance, Impression management among college students <p>Psychological Tests: Any 03 from the list given below</p> <ol style="list-style-type: none"> 1. Conformity Scale 2. Prejudice Scale 3. Locus of Control Scale 	30

	4. DAT or David's Battery of Differential Ability (Abstract Reasoning) 5. Personality Test.	
Pedagogy	Lectures, PowerPoint presentations, and discussions of socially relevant situations to enhance learning	
Books for Reference	<p>Books for Reference:</p> <ol style="list-style-type: none"> 1. Branscombe, N. R., Baron, R. A., & Adapted by Preeti Kapur. (2017). <i>Social psychology</i>. Course Outcomes	At the end of the course, the learner will be able to: <ol style="list-style-type: none"> 1. Explain the processes of attitude formation; 2. Recognize/ identify the causes of stereotypes; 3. Describe non-verbal communication and its various channels and 4. Assimilate/ interpret the concept of impression formation. 	

Name of the Programme : BA PSYCHOLOGY
 Course code : PSY-201
 Title of the Course : HEALTH PSYCHOLOGY
 Number of Credits : 04
 Effective from AY : 2024-25

Pre-requisites for the course	The student should have completed the basic psychology courses, in the previous semester	
Course Objectives:	1. Acquire an understanding of the field of health psychology and its role in health and illness. 2. explore the elements involved in the process of health behavior change using the major models of health behavior. 3. Study the psychophysiological basis of major chronic illnesses and evaluate factors for enhancing health and preventing illnesses.	
		No. of hours
Content:	CHAPTER I: INTRODUCTION TO HEALTH PSYCHOLOGY 1. Definition of health, Illness Wellness Continuum, Careers and training in health psychology 2. Health Psychology: definition and goals 3. Seeing a Need: Psychology's role in health 4. Current perspectives on health and illness: biopsychosocial perspective, life-span, and gender perspective	15
	CHAPTER II: DETERMINANTS OF HEALTH BEHAVIOURS 1. Introduction to health behaviours, Health promotion: an overview, Changing health habits. 2. Health belief model, Theory of planned behaviour, and Tran theoretical model of behaviour change 3. Cognitive behavioural approaches to health behaviour change 4. Venues for health-habit modification	15
	CHAPTER III: CHRONIC ILLNESSES 1 Heart disease - Symptoms, Causes, Medical treatment and Rehabilitation of cardiac patients, Psychosocial impact and Psychosocial interventions. 2 Diabetes – Types and causes, Health implications of diabetes, Medical regimes for diabetes, Psychosocial factors in diabetic care. 3 Stroke- Causes, effect and rehabilitation, Psychosocial aspects of stroke 4 Cancer-Prevalence and types, Sites, effects and causes of cancer, Diagnosing and treating cancer, Psychosocial impact and Psychosocial interventions for cancer.	15
	CHAPTER IV: HEALTH ENHANCEMENT AND ILLNESS PREVENTION	15

	<ol style="list-style-type: none"> 1. Health Promoting Behaviours - Exercise, Developing a healthy diet and Sleep 2. Preventing Illnesses - Accident prevention and Vaccination and screening 3. Health-compromising behaviours: Characteristics of health-compromising behaviours, Alcoholism and problem drinking, Smoking, Unsafe sexual behaviour and AIDS. 4. Patients, Providers, and Treatments – Health care services, Nature of patient-provider communication, Results of poor patient-provider communication and improving poor patient-provider communication and increasing adherence to treatment. 	
Pedagogy	<ol style="list-style-type: none"> 1 A blend of traditional teaching techniques, lectures and problem-based learning may be used in the classroom. 2 The ideas addressed in this course can be better explored through experiential learning tools such as group discussions, role plays, debates, flipped learning demonstrations and sharing of experiences, among others during lectures. 3 Facilitators are also encouraged to use ICT tools such as PowerPoint Presentations/ Ted talks/ documentary of science to facilitate engagement with syllabus topics.

Course Outcomes	<p>At the end of this course, the learners will be able to:</p> <ol style="list-style-type: none"> 1. Describe the field of health psychology and its role in health and illness; 2. Explain the determinants of health behavior from various theoretical perspectives; 3. Validate/evaluate the psychophysiological aspects of major chronic illnesses and 4. Apply psychosocial methods to enhance health behaviors and prevent illnesses. 	

Name of the Programme : BA PSYCHOLOGY
Course code : PSY 211
Title of the Course : ADOLESCENT PSYCHOLOGY
Number of Credits : 04
Effective from AY : 2024-25

Pre-requisites for the course	The student should have completed the basic psychology courses in the previous semesters	
Course Objectives:	1. Gain an insightful understanding of Physical, Cognitive, and Socio-emotional, Development in Adolescence; 2. Analyze the role of peers in shaping an adolescent's personality and 3. Orient the students towards adolescent problems, and preventive and treatment measures.	
		No. of hours
Content:	CHAPTER I: PHYSICAL DEVELOPMENT IN ADOLESCENCE 1 Nature of Adolescence 2 Puberty: Sexual maturation, height and weight, hormonal changes, timing and variation in puberty, body image, early and late maturation 3 Adolescent Sexuality: Developing a sexual identity, risk factors in adolescent sexual behaviour Self-stimulation, Contraceptive use, adolescent pregnancy, Lifespan, Sexually Transmitted Infections, Adolescent Health: Nutrition and Exercise, Sleep, Leading causes of death in adolescence	15
	CHAPTER II: COGNITIVE DEVELOPMENT IN ADOLESCENCE 1 Cognitive Developmental View: Piaget's Theory, Vygotsky's Theory 2 The Information Processing View: cognitive resources, mechanisms of change; Critical thinking 3 Importance of Achievement in Adolescence: Achievement processes, mastery motivation, self-efficacy, expectation, goal setting, planning and self-monitoring, time management, mentoring, some obstacles to achievement 4 Multiple Intelligences, Service Learning	15
	CHAPTER III: SOCIO EMOTIONAL DEVELOPMENT IN ADOLESCENCE 1 The Self, self-esteem, and self-concept: Dimensions of adolescents self-understanding, self, what are self-esteem and self-concept, does self-esteem change during adolescence, Social context and self-esteem, consequences of low self-esteem, increasing adolescents self-esteem	15

	<ol style="list-style-type: none"> 2 Identity: Erikson's ideas on identity, some contemporary thoughts on identity, developmental changes in identity, identity and the social contexts, identity and intimacy. 3 The emotions of adolescence: hormones experiences and emotions, emotion regulation, emotional competence, social emotional education programs 4 Families: Parental monitoring and Information Management, Parent Adolescent Conflict 	
	<p>CHAPTER IV: PEERS, CULTURE, ADOLESCENT PROBLEMS & INTERVENTION</p> <ol style="list-style-type: none"> 1 Friendships; peer groups, dating, and romantic relationships 2 Culture & Adolescent Development, cross-cultural comparisons, socio-economic status and poverty, media use, and screen time. 3 Adolescent problems: Juvenile Delinquency, Depression, and Suicide; Drug use: why do adolescents take drugs?; Alcohol; effects of alcohol on adolescent behavior and brain activity, alcohol use in adolescence & emerging adulthood, risk factors in adolescent alcohol use, cigarette smoking 4 Prevention / Intervention of Adolescent problems 	15
Pedagogy	<ol style="list-style-type: none"> 1. A blend of traditional teaching techniques, lectures and problem-based learning may be used in the classroom. 2. The ideas addressed in this course can be better explored through experiential learning tools such as group discussions, role plays, debates, flipped learning demonstrations and sharing of experiences, among others during lectures. 3. Facilitators are also encouraged to use ICT tools such as PowerPoint Presentations/ Ted talks/ documentary of science to facilitate engagement with syllabus topics. 	
Books for Reference	<p>Books for Reference:</p> <ol style="list-style-type: none"> 1. Santrock J.W (18th edition) Adolescence. New York: Tata Mc Graw Hill Publishing Company Limited. 2. Santrock J.W (17th edition) Lifespan Development. New York: Tata Mc Graw Hill Publishing Company Limited. 	
Course Outcomes	<p>At the end of the course the students will be able to :</p> <ol style="list-style-type: none"> 1. Understand physical and Cognitive Development in Adolescence; 2. Explore the socio-emotional development in Adolescence; 3. Analyze the role of peers in shaping an adolescent's personality and 4. Comprehend adolescent problems, preventive and treatment measures. 	

Name of the Programme : BA PSYCHOLOGY
Course code : PSY-231
Title of the Course : RELATIONSHIP PSYCHOLOGY
Number of Credits : 03
Effective from AY : 2024-25

Pre-requisites for the course	The student should have completed the basic psychology courses in the previous semesters	
Course Objectives:	<ol style="list-style-type: none"> 1. Understand the fundamental concepts of relationships, exploring their significance, the impact of early relationships, and key theoretical perspectives. 2. Analyze and apply prominent relationship theories (social exchange, attachment, social penetration) to interpret determinants of friendship, attraction, marriage stages, and professional dynamics. 3. Develop practical skills in effective communication, collaboration, and emotional intelligence for navigating challenges and understanding relationship breakdowns in diverse contexts. 	
Content:		No. of hours
	CHAPTER I: UNDERSTANDING HUMAN RELATIONSHIPS <ol style="list-style-type: none"> 1. Defining relationships and understanding the importance of relationships 2. Early relationships' and their impact on later relationships 3. Theoretical perspectives in the study of close relationships: Evolutionary approaches, Social exchange and Equity approaches, Cognitive-behavioral approaches, Attachment approaches 4. What people bring into relationships: attachment styles, conflict, and communication skills, attributions, implicit theories, and expectations 	15
	CHAPTER II: CLOSE AND PROFESSIONAL RELATIONSHIPS <ol style="list-style-type: none"> 1. Perspectives on close relationships: the ingredients of close relationships, culture and relationship, the internet and relationships. 2. Friendship and love: Determinants of friendship and attraction, Social penetration theory, Gender differences in friendships, Sexual orientation and Love, Gender differences regarding love, Theories of love, the course of romantic love 3. Marriage: Affective structure, Stages of marriage, Challenges to the traditional model of Marriage 4. Professional Relationships: Effective communication and collaboration, Leadership impact on workplace relationships, Role of Emotional intelligence. 	15

	CHAPTER III: THREATS TO RELATIONSHIPS, RELATIONSHIP SATISFACTION AND COMMITMENT, AND RELATIONSHIP BREAKDOWN <ol style="list-style-type: none"> 1. Threats to Relationships: Loneliness and Social Isolation, The Process of Dyadic Coping, Lying and Deception in Close Relationships, Extradynamic Relations and Jealousy, Intimate Violence 2. Determinants of Relationship satisfaction: Social Exchange and equity, Intimacy, Self-disclosure, Social comparison, Social networks, Attachment, Inter-dependence theory, Communication 3. The Breakdown of a relationship: Relationship dissolution model 	15
Pedagogy	<ol style="list-style-type: none"> 1. A blend of traditional teaching techniques- lecturing and problem-based learning may be used in the classroom. 2. The ideas addressed in this course can be better explored through experiential learning tools such as group discussions, role play, debates, flipped learning demonstrations and sharing of experiences, among others, during lectures. 3. Facilitators are also encouraged to use ICT tools such as Power Point Presentations/ Ted talks/ documentary of science to facilitate engagement with syllabus topics. 	
Books for Reference	Books for Reference: <ol style="list-style-type: none"> 1. Baron, R. A., Branscombe, N. R., & Byrne, D. Bhardwaj, G. (2008). Social psychology. (12th ed.). New Delhi: Pearson Education, Indian subcontinent adaptation 2009. 2. Baron, R.A., Byrne, D. & Bhardwaj. G. (2010). Social psychology (12thEd).New Delhi: Pearson. 3. Crisp, R.J., Turner, R.N. (2014). Essential social psychology, Third Edition, New-Delhi: Sage Publications India Private Ltd. 	
Course Outcomes	<p>At the end of this course, the learner will be able to:</p> <ol style="list-style-type: none"> 1. Demonstrate a thorough grasp of fundamental relationship concepts, including the significance and lasting impact of early relationships; 2. Understand the key theoretical perspectives; 3. Apply prominent relationship theories (social exchange, attachment, social penetration) to interpret determinants of friendship, attraction, marriage stages, and professional dynamics; 4. Develop practical skills in effective communication and collaboration and 5. Apply emotional intelligence to navigate challenges and understand relationship breakdowns in diverse contexts. 	

Name of the Programme : BA PSYCHOLOGY
Course code : PSY-241
Title of the Course : DEVELOPING PSYCHOLOGICAL SKILLS
Number of Credits : 3 (1 +2)
Effective from AY : 2024-25

Pre-requisites for the course	The student should have completed the basic psychology courses in the previous semesters	
Course Objectives:	1. Comprehend the basic skills involved in psychological inquiry protocol 2. Understand the fundamentals of psychological first aid and its role in providing immediate support to individuals experiencing trauma or crisis. 3. Develop skills in dealing with different crises.	
		No. of hours
Content:	CHAPTER I: PSYCHOLOGICAL INQUIRY PROTOCOL: THE INTERVIEW 1. Types of interviews 2. Arrangements for the interview 3. Stages in the initial assessment: Opening phase, middle portion, Final phase 4. Communication: Language and non-verbal	05
	CHAPTER II: SKILLS IN PROVIDING PSYCHOLOGICAL FIRST AID (PFA) 1. Understanding PFA: Overview of PFA principles, objectives, and its role in immediate crisis support. 2. Basic skills of psychological first aid: Look, listen, and link 3. Assessing immediate needs, prioritizing interventions, and delivering appropriate PFA strategies in different contexts, such as natural disasters, accidents, or community crises, psycho-education, making referrals	05
	CHAPTER III: COMPLEX REACTIONS AND CRISES RESPONSE SKILLS: 1. Different types of crises: personal, social, health challenges, natural disasters, men made disasters, violence 2. Different complex reactions during crises: panic and anxiety, anger and aggression, self-harm and suicide, prolonged grief, sleep problems, PTSD, flash backs, depression 3. Active listening, empathy, and effective communication strategies in crises. 4. Ethical Considerations: maintaining confidentiality and respecting boundaries, addressing cultural variations in psychological distress, ensuring sensitivity to diverse backgrounds.	05

	<p><u>PRACTICUM COMPONENT</u></p> <p>Conduct of Any two psychological inquiry mock interviews</p> <ul style="list-style-type: none"> • 3 Case study analysis of crises intervention: Evaluate the effectiveness of psychological first aid interventions through case studies, research findings, and real-world examples, considering both short-term and long-term outcomes. • The Case Studies should analyse real or hypothetical case studies that involve complex psychological issues. Participants can then collaboratively develop intervention strategies, fostering critical thinking and problem-solving skills. <p>Qualitative Practicum:</p> <ul style="list-style-type: none"> • Focus group discussion (with 5-8 participants), interviews (with minimum 3 participants), or survey (around 25 participants) on strategies used in times of crises. Adaptive coping, maladaptive coping, and addressing highly negative emotions (guilt and shame). Compilation of data to be done in practical batches- for coding common emerging themes. • Qualitative assessment: Diary methods in psychological research: Entries related to qualitative analysis of feelings/emotional well-being; observing students' progress through the semester. • Reflective Journaling: Incorporate reflective journaling as a practicum component, encouraging participants to document their experiences, emotions, and insights during simulated or real-life situations. This promotes self-awareness and continuous improvement. • Assessment and Prioritization: Training on assessing immediate needs and prioritizing interventions based on the severity of psychological distress. • Multicultural Sensitivity Training: Design exercises and activities that focus on developing cultural competence and sensitivity. This can include scenarios that challenge participants to adapt their psychological skills to diverse cultural contexts. <p>A minimum of 06 entries and a maximum of 10 hours have to be journaled by the student.</p> <p>The format to be followed in dairy entries (minimum 5) is as follows:</p> <p>Reflection questions:</p> <ul style="list-style-type: none"> • Incident: (Description): What happened 	<p>60</p>
--	--	------------------

	<ul style="list-style-type: none"> Insight and awareness: What were you thinking and feeling (Cognitive process and emotional awareness) Evaluation: what was good and bad about the process? Analysis: what sense can you make about the process? Conclusion: What else could you have done? Action plan: if it arose again what can you do? <p>Workshop/ skill training: (any two of ten hours each)</p> <ul style="list-style-type: none"> Anger management after a traumatic experience Discuss how the anger is affecting their life (for example, relationship with family members and friends, parenting). Crisis Simulation Exercises: Develop crisis simulation exercises to help participants navigate and respond to simulated psychological emergencies. This could include scenarios like natural disasters, accidents, or community crises. Role-Playing Scenarios: Create realistic role-playing scenarios that simulate various psychological challenges, allowing individuals to practice and refine skills such as active listening, empathy, and providing support in different contexts. Field trips to visit hospital OPD to understand the nature of critical care 	
Pedagogy	<ol style="list-style-type: none"> A blend of traditional teaching techniques- lecturing and problem-based learning may be used in the classroom. The ideas addressed in this course can be better explored through experiential learning tools such as group discussions, role play, debates, flipped learning demonstrations and sharing of experiences, among others, during lectures. Facilitators are also encouraged to use ICT tools such as Power Point Presentations/ Ted talks/ documentary of science to facilitate engagement with syllabus topics.

Apply core life skills such as emotional regulation, decision-making, and communication to manage challenges effectively. 3. Analyze wellness techniques, including yoga, meditation, and compassion, to promote resilience and wellbeing. 	

Semester V**Name of the Programme : BA PSYCHOLOGY****Course Code : PSY-300****Title of the Course : PSYCHOLOGICAL TESTS AND MEASUREMENTS****Number of Credits : 3T + 1P****Effective from AY : 2024-25**

Pre-requisites for the Course:	The student should have completed the basic psychology courses and in addition to completing the regular BA degree requirements.	
Course Objectives:	<ol style="list-style-type: none"> 1 Understand the fundamentals of psychological testing. 2 Recognise the ethical implications of psychological testing. 3 Analyse the current trends and future direction of psychological testing. 4 Explore the steps involved in developing a psychological test. 5 Understanding the purpose and types of reliability and validity estimates. 	
		No. of Hours
	CHAPTER I: INTRODUCTION TO PSYCHOLOGICAL TESTING <ol style="list-style-type: none"> 1. Definition, History and Purpose of Psychological Testing: Definition of a Psychological Test, Historical development of psychological testing, Importance of Psychological testing in various fields 2. Types of Psychological Tests: Classification based on purpose (aptitude, personality, intelligence, interest), Classification based on administration format (Performance, verbal/paper pencil), Classification based on setting (individual, group) 3. Ethical and Social Implications of Testing: Responsibilities of test publishers, Responsibilities of test users 4. Rights of test takers: The right of informed consent, right to be informed of test findings, right to privacy and confidentiality, right to the least stigmatizing label 5. Test Administration Procedures: Preparing the test environment, Preparing the test taker, Preparing of the examiner 6. Testing special populations: Test takers with physical or mental challenges, Test takers with learning disabilities, Test takers from multicultural backgrounds 7. Computerized Test development: Advantages and challenges of computerized testing, Computer adaptive testing (CAT) and its benefits 8. The future of psychological testing: Trends in testing 	15
	CHAPTER II: TEST DEVELOPMENT AND DESIGN <ol style="list-style-type: none"> 1. Test Conceptualization: Steps involved in developing a psychological test, Norm-referenced versus criterion-referenced tests, Pilot work 2. Test Construction: Scaling, writing items, Scoring items 3. Test tryout 	15

	<ol style="list-style-type: none"> 4. Item analysis: Item difficulty index, Item reliability index, Item validity index, Item discrimination index, Qualitative item analysis 5. Test revision: Test revision as a stage in new test development, Test revision in the life cycle of an existing test, Use of Item Response Theory (IRT) in building and revising Tests, Developing scoring criteria and rubrics for subjective items 6. Innovations in Test Development: Integrating technology, artificial intelligence and data analytics in test creating, Ethical considerations in the use of emerging technologies 7. Interpreting test scores: Frequency distribution, The Normal Curve, Descriptive Statistics, Standard Scores, Norms 8. Feedback and reporting: General guidelines in communicating test results, Format for a Psychological Report, Ethical considerations in providing test feedback 	
	<p>CHAPTER III: RELIABILITY AND VALIDITY</p> <ol style="list-style-type: none"> 1. Sources of Error Variance: Test construction, Test administration, Test scoring and interpretation, Other Sources of error 2. Classical Test Theory 3. Reliability Estimates: Test-retest reliability estimates, Parallel-forms and alternate forms reliability estimates, Split-half reliability estimates, Internal Consistency estimates, Measures of Inter-scorer reliability 4. Interpreting a Coefficient of reliability 5. The purpose of reliability coefficients 6. Factors that influence reliability 7. Validity and validity estimates: Face validity, Content validity, Criterion validity (Predictive and concurrent), Construct validity 8. Threats to Validity: Common sources of invalidity in testing, Minimizing construct-irrelevant variance and other threats 	15
Content:	<p>PRACTICUM</p> <p><u>Any 1 test from each of the five categories</u></p> <ol style="list-style-type: none"> 1. Theme: Intelligence testing <ol style="list-style-type: none"> a) WAIS (Pearson) b) Bhatia Battery of Performance Intelligence Test (Psychometrics) c) Binet Kamat Intelligence Test (BKT) (Psychomatrix) 2. Theme: Personality testing <ol style="list-style-type: none"> a) 16 PF Questionnaire (any one form A-E) Indian (Psychotronics) b) TAT India set of cards by Uma Chowdary (any 3 cards) (Psychometrics) c) Eysenck Personality Questionnaire R (Psychomatrix) 3. Theme: Specific population/specific ability testing 	30

	<ul style="list-style-type: none"> a) Children Apperception Test – Animal (Indian Adaptation) by Uma Choudary (Psychometrics) b) Passi Test of Creativity by B. K. Passi (Psychotronics) c) Cognitive and Linguistic Quick Test (Pearson) <p>4. Theme: Adjustment/Value/interest testing</p> <ul style="list-style-type: none"> a) Adjustment Inventory for College Students by A. K. P. Sinha and R. P. Singh (English) (Psychometrics) b) Value Orientation Scale by N.S. Chauhan and S. Aurora (English) (Psychotronics) c) Vocational Preference Inventory (Psychotronics) <p>5. Theme: Ability testing</p> <ul style="list-style-type: none"> a) DAT (any 3 subtests)/David's Battery of Differential Abilities (Psychotronics) b) Finger dexterity board/test (Psychotronics) c) Vocational preference inventory (Psychometrics) 	
Pedagogy:	<p>1. A blend of traditional teaching techniques- lecturing and problem-based learning may be used in the classroom. The Ideas addressed in this course can be better explored through experiential learning tools such as group discussions, role play, debates, flipped learning demonstrations and sharing of experiences, among others, during lectures.</p> <p>2. Facilitators are also encouraged to use ICT tools such as Power Point Presentations/ Ted talks/ documentary of science to facilitate engagement with syllabus topics.</p>

Name of the Programme : BA PSYCHOLOGY
Course Code : PSY-301
Title of the Course : COUNSELING PSYCHOLOGY
Number of Credits : 04
Effective from AY : 2024-25

Pre-requisites for the Course:	The student should have completed the basic psychology courses in the previous semester and the regular BA degree requirements.	
Course Objectives:	1. Develop skills essential for professional counselors. 2. Learn the application of various therapies in counseling. 3. Sensitize the students with different specialty areas in counselling 4. Gain insight into the contemporary trends in counselling	
Content:		No of hours
	CHAPTER I: INTRODUCTION TO COUNSELING 1. Meaning and goals of counselling 2. The effective counselor: Personal characteristics, Therapeutic relationship: Importance, components 3. The facilitative conditions and counselling relationship: empathetic understanding, unconditional positive regard, congruence 4. Ethical issues and dilemmas in counseling	15
	CHAPTER II: tactics and techniques of counselling 1. Levels of counselling techniques: nonverbal and verbal behaviours: the response mode approach 2. Cultural diversity and cross cultural counselling : definition, barriers and biases, stereotypes in treatment 3. Stages and process of counselling	15
	CHAPTER III: COUNSELING SPECIALTIES 1. Marriage, couple and family counselling: the family system approach 2. Crises Counselling: suicide , grief and sexual abuse 3. Deaddiction counselling: The twelve step program 4. Group counselling: advantages and limitation , therapeutic factors in group work and ethical concerns (confidentiality, informed consent) (A field trip to a counseling centre or deaddiction facility)	15
	CHAPTER IV: CONTEMPORARY TRENDS IN COUNSELING 1. Technology and Counseling 2. Counseling diverse populations: Gender-based counseling, sexual orientation 3. Emerging counseling therapies: Expressive Therapy (Art, music, and dance), Ecotherapy (Nature-based interventions and biophilia hypothesis), Animal-assisted therapy 4. Mindfulness-based interventions	15

Pedagogy:	<ol style="list-style-type: none"> 1 A combination of conventional teaching methods, such as lectures, and case-based learning may be employed. 2 The concepts covered in this course can be more effectively examined using hands-on, practical experiences and learning methods such as field visits, role play, simulation and group discussion.
References/ Readings:	<p>References:</p> <ol style="list-style-type: none"> 1. Gladding S.T. (2009). Counseling: A comprehensive profession. (6th ed.). Dorling Kindersley India Pvt. Ltd 2. Nelson-Jones, R. (2012). Basic counselling skills: A helper's manual. (3rd ed.) Sage Publications India Pvt. Ltd. 1. Rao, N. S. (2017). Counseling and Guidance. (3rd ed.). (2009). Introduction to Counseling Skills: Text and Activities. (4th ed.). London: Sage Publications.Gibson, 2. R.L. and Mitchell (2015). Introduction to counselling and guidance. (7th eds.). Pearson India Education Services; 3. Welfel, E. R., & Patterson, L. E. (2012). The Counseling Process: A Multi-theoretical Integrative Approach. (6th ed.). Cengage learning;
Course Outcomes:	<ol style="list-style-type: none"> 1. Understand the characteristics and skills essential for professional counselors; 2. Analyse the various counseling therapies and their application; 3. Explore the specialty areas in counseling and 4. Implementing counseling interventions in everyday life.

Name of the Programme : BA PSYCHOLOGY
 Course Code : PSY-302
 Title of the Course : ABNORMAL PSYCHOLOGY
 Number of Credits : 04
 Effective from AY : 2025-26

Pre-requisites for the course	The student should have completed the basic psychology courses in the previous semester and the regular BA degree requirements.	
Course Objectives:	1. Understand the classification, and the clinical picture of various psychological disorders. 2. Explore the historical development of abnormal psychology. 3. Analyze the causal factors implicated in psychological disorders. 4. Examine the importance of family and social support in the treatment of mental illness, and legal issues involving people with mental illness.	
		No. of Hours
Content:	CHAPTER I: AN OVERVIEW OF ABNORMAL PSYCHOLOGY 1. Indicators of Abnormality, The DSM-5 and the definition of mental disorder, Classification and Diagnosis. 2. Historical views of abnormal behaviour- Demonology, Gods and Magic, Hippocrates' early medical concepts, Views of abnormality during the Middle Ages, Establishment of early asylums, Humanitarian reform. 3. The emergence of contemporary views of abnormal behaviour- Biological discoveries: Establishing the link between brain and mental disorder, Development of the psychological basis of mental disorder. 4. Clinical Assessment and Diagnosis-The basic elements in assessment, Physical assessment of the organism, Psychosocial assessment, and The integration of assessment data.	15
	CHAPTER II: CAUSAL FACTORS AND VIEWPOINTS 1. Risk Factors and Causes of Abnormal Behavior-Necessary, sufficient, and contributory causes, Diathesis-Stress Models. 2. The Biological Perspective: Genetic vulnerabilities, Brain dysfunction and neuroplasticity, Imbalance of neurotransmitters and hormones, Temperament. 3. The Psychological Perspective: Psychodynamic perspective, Behavioural perspective, Cognitive-behavioural perspective 4. The Social Perspective-Early deprivation or trauma, Problems in parenting styles, Marital discord and divorce, Maladaptive peer relationships, Prejudice and discrimination in race, Gender, and ethnicity.	15
	CHAPTER III: EXPLORING NEW ADDITIONS IN DSM V:	15

	<ol style="list-style-type: none"> 1. Trauma and stress-related disorders: Adjustment disorder, PTSD, and Acute stress disorder. 2. Anxiety disorders: specific phobia, social phobia, panic disorder, agoraphobia, generalized anxiety disorder. Mood disorders: unipolar depressive disorders, bipolar and related disorders. 3. Other psychological disorders: Obsessive-compulsive and related disorders, Body dysmorphic disorder, Hoarding Disorder, Trichotillomania, and Excoriation; Disruptive, impulse control, and Conduct disorders, Oppositional Defiant Disorder, Intermittent explosive disorder, Pyromania, and Kleptomania 4. Gender dysphoria and Paraphilic disorders <p>(All disorders will cover the clinical description and the criteria for diagnosis)</p> <p>Field trip to the IPHB or any other mental health Facility is advocated as part of their teaching-learning experience</p>	
	<p>CHAPTER IV: CONTEMPORARY AND LEGAL ISSUES IN ABNORMAL PSYCHOLOGY</p> <ol style="list-style-type: none"> 1. Perspectives on prevention: Universal interventions, Selective interventions, Indicated interventions. 2. Efforts in India towards mental health care. 3. Other conditions that may be a focus of clinicians' attention (relational problems and abuse and neglect) 4. Controversial legal issues and the mentally ill: Civil Commitment, Assessment of "Dangerousness", The insanity defense, Competence to stand trial. 	15
Pedagogy	<ol style="list-style-type: none"> 1. A blend of traditional teaching techniques- lecturing and problem-based learning may be used in the classroom. 2. The ideas addressed in this course can be better explored through experiential learning tools such as group discussions, role-play, debates, flipped learning demonstrations, and sharing of experiences, among others, during lectures. 3. Facilitators are also encouraged to use ICT tools such as PowerPoint Presentations/TED talks/documentaries of science to facilitate engagement with syllabus topics. 	
Books for Reference	<ol style="list-style-type: none"> 1. American Psychiatric Association, DSM-5 Task Force. (2013). <i>Diagnostic and statistical manual of mental disorders: DSM-5</i> (5th ed.). American Psychiatric Publishing. 2. Mangal, S. K. (2019) <i>Abnormal Psychology</i>. Sterling Publishers Pvt. Ltd. 3. Butcher, J. N., Hooley, J. M. & Mineka, S. (2019). <i>Abnormal Psychology</i> (17th ed.). Pearson India Education. 	
Suggested Readings	<ol style="list-style-type: none"> 1. Kearney, C. A. & Trull, T. J. (2017) <i>Abnormal Psychology and Life: A dimensional approach</i>. Cengage Learning.

Course Outcomes	<p>At the end of this course, the learner will be able to:</p> <ol style="list-style-type: none"> 1. Understand the historical development of and contemporary perspectives on abnormal psychology; 2. Explain the various causal factors of psychological disorders; 3. Demonstrate a comprehensive understanding of various psychological disorders, their symptoms, and diagnostic criteria; 4. Critically analyze the strategies to enhance family and social support in treating mental illness and 5. Assess the legal issues involving people with mental illness.

Name of the Programme : BA PSYCHOLOGY
Course Code : PSY-303
Title of the Course : RESEARCH METHODOLOGY
Number of Credits : 02
Effective from AY : 2024-25

Pre-requisites for the Course:	The student should have completed the basic psychology courses in the previous semester and the regular BA degree requirements.	
Course Objectives:	<ol style="list-style-type: none"> 1. Develop a comprehensive understanding of the essential principles of research methodology and the pivotal role literature plays in research. 2. Explore the diverse techniques for collecting data effectively and gain an insight into the various experimental designs 3. Explore the ethical considerations underlying research and learn to construct effective research reports. 	
		No. of Hours
Content:	CHAPTER 1: INTRODUCTION TO RESEARCH METHODOLOGY <ol style="list-style-type: none"> 1. Meaning of research 2. Goals of Psychological research <ol style="list-style-type: none"> a. Description b. Prediction c. Exploration d. Application 3. Understanding the research process 4. Types of research <ol style="list-style-type: none"> a. Basic v/s Applied, b. Laboratory v/s Field c. Quantitative v/s Qualitative, d. Experimental v/s Non-experimental e. Cross-sectional v/s Longitudinal f. Exploratory v/s Descriptive 5. Formulating research questions and hypothesis <ol style="list-style-type: none"> a. The importance of formulating a research problem b. Sources of research problem c. Steps in formulating of research objectives d. Definition and characteristics of a hypothesis 	10
	CHAPTER II: RESEARCH DESIGNS <ol style="list-style-type: none"> 1. Essential features in a in Psychological Research <ol style="list-style-type: none"> a. Independent, dependent and control variables b. Confounding variables and strategies to control them. 2. Case study Method 3. Single sample design 4. Independent and repeated designs <ol style="list-style-type: none"> a. Between b. Within 	10

	<ul style="list-style-type: none"> c. Matched participant design – Yoked controls design d. Before-after Design <p>5. Quasi Experimental designs</p> <ul style="list-style-type: none"> a. Non-equivalent groups b. Natural experiments 	
	<p>CHAPTER 111: ETHICAL CONSIDERATIONS AND REPORT WRITING</p> <ul style="list-style-type: none"> 1. Ethical considerations in psychological research <ul style="list-style-type: none"> a. Principles of ethical research involving human participants and animals b. Informed consent and deception c. Confidentiality and privacy considerations d. APA Ethics Code for Research with Human Participants 2. Structure of a research report 3. Report writing <ul style="list-style-type: none"> a. Steps in writing a report b. Mechanics of Writing a Research Report c. Precautions for Writing Research Reports d. Lay out of a report e. Oral presentations 4. Presenting research findings: Tables, graphs, and visualizations 5. APA References and Citations <p>(students should be encouraged to attend seminars, conferences at State / National level)</p>	10
Pedagogy:	<ul style="list-style-type: none"> 1 A blend of traditional teaching techniques- lecturing and problem-based learning may be used in the classroom. 2 The ideas addressed in this course can be better explored through experiential learning tools such as group discussions, role play, debates, flipped learning demonstrations and sharing of experiences, among others, during lectures. 3 Facilitators are also encouraged to use ICT tools such as Power Point Presentations/ Ted talks/ documentary of science to facilitate engagement with syllabus topics.

Course Outcomes:	<p>At the end of this course, the learner will be able to:</p> <ol style="list-style-type: none"> 1. Develop a comprehensive understanding of the essential principles of research methodology; 2. Understand the pivotal role literature plays in research; 3. Explore the diverse techniques for collecting data effectively; 4. Gain an insight into the various experimental designs; 5. Explore the ethical considerations that underline research and 6. Learn to construct effective research reports.

SEMESTER V**Name of the Programme : BA PSYCHOLOGY****Course Code : PSY-361****Title of the course : INTERNSHIP****Number of Credits : 2****Effective from AY : 2024-25**

Pre-requisites for the Course:	The student should have completed the basic psychology courses, in addition to completing the regular BA degree requirements.	
Course Objectives:	Gain experience and in situ hands-on understanding of a career in psychology	
		No. of Hours
Content:	Internship should involve I – OBSERVATION AND COMMUNITY OUTREACH Observation in various field settings: NGOs, schools, private practitioner clinics, companies and industrial/ corporate organizations. Observation log book to be maintained. Help with Organizing and conducting one workshop with any of the targetgroups (adolescents, parents, educators, employees etc.)	30
	II – ADMINISTRATION SERVICES AT A MENTAL HEALTH FACILITY The student should be involved with administrative services in any of the various field settings: NGOs, schools, private practitioner clinics, companies and industrial/ corporate organizations.	30
Pedagogy:	In situ experiential learning	
Course Outcomes:	At the end of this course, the student will be able to: 1. Understand the role of a psychologist in various settings and management plan; 2. Demonstrate planning and organization skills by conducting awareness sessions on selected topics related to mental health	

Name of the Course : BA PSYCHOLOGY
Course Code : PSY-321
Title of the Course : Qualitative Data Analysis
Number of Credits : 04
Effective for AY : 2024-2025

Pre-requisites for the course	The student should have completed the basic psychology courses in the previous semester and the regular BA degree requirements.	
Course Objectives	1. Understand different methods of qualitative data collection 2. Compare and contrast the different approaches to qualitative data analysis 3. Apply knowledge to design and execute qualitative data analysis in research	
		No. of Hours
Contents	CHAPTER I: INTRODUCTION TO QUALITATIVE RESEARCH IN PSYCHOLOGY 1. Definition and Characteristics of Qualitative Research 2. Emergence of qualitative research in psychology 3. Writing a Good Qualitative Report 4. Ensuring Quality in Qualitative Research	15
	CHAPTER II: COLLECTING DATA FOR QUALITATIVE RESEARCH: 1. Qualitative Interviewing: Defining, Choosing, Conducting, Analyzing, Evaluating 2. Focus Groups: Defining, Choosing, Conducting, Analyzing, Evaluating 3. Ethnography and Participant Observations: Defining, Using, Conducting, Analyzing 4. Transcription of Qualitative Data	15
	CHAPTER III: ANALYSING QUALITATIVE DATA I: 1. Thematic Analysis: Defining, Conducting, Analysing, Evaluating, When to Use 2. Grounded Theory: Defining, Conducting, Analysing, Evaluating, When to Use 3. Discursive Psychology: Theoretical Principals, and Practicalities of Research	15
	CHAPTER IV: ANALYSING QUALITATIVE DATA II: 1. Narrative Analysis: Defining, Conducting, Analysing, Evaluating, When to Use 2. Conversational Analysis: Defining, Data Collection, Data Analysis, Evaluation 3. Interpretative Phenomenological Analysis: Defining, Data Collection, Data Analysis, Evaluation	15

Pedagogy	<ol style="list-style-type: none"> 1. A blend of traditional teaching techniques- lecturing and problem-based learning may be used in the classroom. 2. The ideas addressed in this course can be better explored through experiential learning tools such as group discussions, role play, debates, flipped learning demonstrations and sharing of experiences, among others, during lectures. 3. Facilitators are also encouraged to use ICT tools such as Power Point Presentations/ Ted talks/ documentary of science to facilitate engagement with syllabus topics.
References	<ol style="list-style-type: none"> 1. Howitt, D. (2019). <i>Introduction to qualitative research methods in psychology: Putting theory into practice</i> [4th ed.]. Pearson 2. Willig, C., & Stainton-Rogers, W. S. (Eds.) (2017). <i>The Sage handbook of qualitative research in psychology</i> [2nd ed.]. SAGE Publications.
Course Outcomes	<p>At the end of the course, students will be able to:</p> <ol style="list-style-type: none"> 1. Explain various techniques for collecting qualitative data; 2. Understand the theory behind qualitative data analysis; 3. Evaluate diverse strategies employed in qualitative data analysis and 4. Utilize acquired knowledge to formulate and implement qualitative research in psychology

Semester VI**Name of the Programme : BA PSYCHOLOGY****Course Code : PSY-304****Title of the Course : COGNITIVE PSYCHOLOGY****Number of Credits : 3+1****Effective from AY : 2024-25**

Pre-requisites for the course	The student should have completed the basic psychology courses, in addition to completing the regular BA degree requirements.	
Course Objectives	<ol style="list-style-type: none"> 1. To provide core knowledge of basic and higher order cognitive processes 2. To develop a general understanding of cognitive psychology as a science. 3. To highlight the neuropsychological basis in cognition. 4. To create a foundation for higher education and careers in cognitive psychology. 5. To develop an understanding of the experiments and research in cognitive psychology 	
		No. of Hours
Contents	CHAPTER I: FOUNDATIONS OF COGNITIVE PSYCHOLOGY <ol style="list-style-type: none"> 1. Nature of Cognitive Psychology 2. Evolution of Cognitive Psychology: history 3. Research Methods in Cognitive Psychology 4. Paradigms of Cognitive Psychology 5. Current Trends in Cognitive Psychology: Cognitive Neuroscience, Cognition and Artificial Intelligence 	15
	CHAPTER II: LOWER ORDER COGNITIVE SKILLS <ol style="list-style-type: none"> 1. Attention: Nature and Types, Theories of attention (bottleneck theories, Spotlight theories, schema theories, inattention blindness) 2. Perceptual Processes: Top-Down and Bottom-Up processes 3. Imagery: Nature of Mental Imagery, Imagery and the brain, using imagery to improve memory 4. Memory: Models of memory (Information Processing Model, Levels of Processing Model, Working Memory Model), narrative and autobiographical memory, semantic memory, forgetting-nature and theories (decay, interference), memory and the brain 5. Concept formation: Nature and types of concepts, forming new concepts, concepts and the brain 	15
	CHAPTER III: HIGHER ORDER COGNITIVE SKILLS <ol style="list-style-type: none"> 1. Language: structure, language comprehension and production, language acquisition 2. Reasoning: Deductive and Inductive Reasoning, approaches to the study of reasoning 	15

	<div>3. Problem Solving: the problem solving cycle, methods of solving problems, blocks to problem solving</div> <div>4. Intelligence: nature of intelligence, History of intelligence testing, theories of intelligence (Spearman's, Gardner's , and Sternberg's Theories)</div> <div>5. Creativity: the creative process, investment theory of creativity, neuroscience of creativity</div>	
	<div>PRACTICUM:</div> <div><u>Any 5 out of 8</u></div> <div><div>1. Span of apprehension for dots.</div><div>2. Distraction of attention.</div><div>3. Division of attention.</div><div>4. Method of serial recall.</div><div>5. Comparative study of proactive and retroactive inhibition.</div><div>6. Concept formation.</div><div>7. Span of attention for unrelated letters and words.</div><div>8. Set in problem solving.</div></div>	<div>30</div>
<div><div>Pedagogy</div></div>	<div>1. A blend of traditional teaching techniques- lecturing and problem-based learning may be used in the classroom.</div> <div>2. The ideas addressed in this course can be better explored through experiential learning tools such as group discussions, role play, debates, flipped learning demonstrations and sharing of experiences, among others, during lectures.</div> <div>3. 	<ol style="list-style-type: none"> 2. Matlin, M.W. & Farmer, T.A. (2016) Cognition (9th ed.). New Jersey, USA: John Wiley & sons 3. Groome, D. (2013). An introduction to cognitive psychology: Processes and disorders. Psychology Press. 4. Groome, D., & Eysenck, M. (2016). An introduction to applied cognitive psychology (2nd ed.). Psychology Press.
Course Outcomes:	<p>At the end of this course, the learner will be able to:</p> <ol style="list-style-type: none"> 1. Define the fundamental concepts in cognitive psychology; 2. Explain the paradigms and current trends in cognitive psychology; 3. Apply the principles of cognitive psychology to solve real world problems; 4. Analyse the neuropsychological correlates of cognitive processes and 5. Demonstrate the occurrence of various cognitive processes in a controlled environment.

Name of the programme : BA PSYCHOLOGY
 Course Code : PSY-305
 Title of the Course : STATISTICS FOR PSYCHOLOGY
 Number of Credits : 04
 Effective from AY : 2024-25

Pre-requisites for the course:	Students are expected to have fulfilled the basic psychology course requirements in preceding semesters, alongside meeting the standard criteria for obtaining a BA degree	
Course Objectives:	1. Understand the various concepts of statistics and graphical representation of data. 2. Identify the uses and applications of descriptive statistics. 3. Assess the properties of the normal probability curve and hypothesis testing. 4. Evaluate the concepts of percentiles, percentile ranks, correlations, and types.	
Content:		No of hours
	CHAPTER I: UNDERSTANDING BASIC CONCEPTS 1. Descriptive Statistics and Inferential Statistics 2. Variables and Scales of Measurements (nominal, ordinal, interval and ratio) 3. Frequency Distribution 4. Graphical Representation of Data (Frequency Polygon, Histogram, Ogive, Bar graphs and Pie chart)	15
	CHAPTER II: MEASURES OF CENTRAL TENDENCY & VARIABILITY. 1. Calculations of Mean, Median and Mode 2. Properties and uses of Mean, Median and Mode 3. Calculation of standard Deviation 4. Uses and Properties of standard deviation.	15
	CHAPTER III: NORMAL PROBABILITY CURVE AND HYPOTHESIS TESTING. 1. Normal probability curve: Properties and Divergence: Skewness and Kurtosis (theoretical concepts) 2. Z scores and Calculating Z scores 3. Hypothesis Testing: Types of hypotheses (Null and alternative hypothesis), Levels of Significance, One-Tail and Two-Tail Test and Type 1 and Type Two Errors 4. Testing Significance of Difference Between Two Means and calculations of student t test (paired and independent samples t test)	15
	CHAPTER IV: PERCENTILE AND CORRELATION. 1. Percentile and Percentile Ranks	15

	2. Calculation and uses 3. Correlation: meaning and uses 4. Calculation of Product Moment method and Rank Difference method	
Pedagogy:	Lectures, power point presentations and calculations of various statistical measures to enhance learning.	
References/ Readings	<p>Books for Reference:</p> <ol style="list-style-type: none"> 1. Garrett, H. E. (2014). Statistics in psychology and education. New Delhi, Lakshi Publishers. 2. Mangal, S. K. Statistical analysis in psychology and education. Tokyo: McGraw-Hill International Book Co, 1981. 	
Course Outcomes:	At the end of the course, the learner will be able to: <ol style="list-style-type: none"> 1. Plot various types of graphs to represent data; 2. Calculate different measures of central tendency and variability; 3. Interpret data via normal probability curve and hypothesis testing and 4. Calculate percentiles, percentile ranks and correlation. 	

Name of the Programme : BA PSYCHOLOGY
Course Code : PSY-306
Title of the Course : CRIMINAL PSYCHOLOGY
Number of Credits : 04
Effective from AY : 2024 - 2025

Pre-requisites for the Course:	Students are expected to have fulfilled the basic psychology course requirements in preceding semesters, alongside meeting the standard criteria for obtaining a BA degree	
Course Objectives:	<ol style="list-style-type: none"> 1. Equip students with the fundamental principles essential for understanding the study of crime. 2. Provide students with the necessary skills to comprehend the dynamic causes of criminal behavior. 3. Investigate and understand various crime types, including their characteristics and societal implications. 4. Develop the ability to analyze and interpret victims' testimonies effectively within a courtroom setting. 	
Content:		No. of Hours
	CHAPTER I: Crime: The Phenomenon <ol style="list-style-type: none"> 1. Applying Psychology to Crime 2. Approaches in Criminal Psychology 3. Measures of Crime 4. What is a crime: Definitions, understanding, labels, social construction of crime 5. Counting Crime versus understanding crime; the fear of crime 	15
	CHAPTER II: Causes of Crime <ol style="list-style-type: none"> 1. The Question of Why 2. Biological and Genetic Explanations 3. Personality Factors 4. Moral Reasoning and Cognitive Distortions 5. Aggression & Violence: Definition and Causes 	15
	CHAPTER III: General & Sexual Offenses <ol style="list-style-type: none"> 1. Violent Offenders 2. Sexual Offender 1: Rapist 3. Sexual Offenders 2: Paedophile and Child Molesters 4. Terrorism 5. Hostage Taking Incidents 	15
	UNIT IV: Courtroom Psychology <ol style="list-style-type: none"> 1. False Allegations 2. False Confessions 3. Lies: Lie Detecting & Credibility 4. Children as Witnesses 5. Mental, Personality & Intellectual Problems in Court 	15

	(Field trip to any one facility of investigation crime, prison rehabilitation set up or court room hearing)	
Pedagogy:	<ol style="list-style-type: none"> 1. Instructional approaches that effectively convey the subject matter which may include practical applications, discussions, and assessments to enhance the understanding of the psychological aspects of criminal behaviour. 2. Use of real – world examples, simulations, and interactive activities to engage students in the application of psychological principles to criminal investigations, profiling, and treatment strategies. 	
References/ Readings:	Books for References: <ol style="list-style-type: none"> 1. Howitt D. (2018). Introduction to forensic and criminal psychology (6th ed.). Pearson. 2. Pakes, F. and Pakes S. (2009) Criminal Psychology, Willan Publishing. 	
Course Outcomes:	<p>At the end of the course, the students will be able to:</p> <ol style="list-style-type: none"> 1. Explain the foundational principles that serve as the basis for the study of crime. 2. Apply acquired skills to comprehend the multifaceted causes of criminal behavior, fostering a nuanced understanding of its dynamics. 3. Explore diverse crime types, 4. Demonstrate an awareness of the unique characteristics of various crime types 5. Understand the broader societal impact of crime. 6. Exhibit proficiency in analyzing and interpreting victims' testimonies within a courtroom context, showcasing an ability to assess and comprehend the complexities inherent in these narratives. 	

Name of the Programme : BA PSYCHOLOGY
Course Code : PSY-307
Course Title : Project
Number of Credits : 04
Effective from AY : 2024-2025

Pre-requisites for the Course:	Students are expected to have fulfilled the basic psychology course requirements in preceding semesters, alongside meeting the standard criteria for obtaining a BA degree	
Course Objectives:	<ol style="list-style-type: none"> 1. Demonstrate the ability to formulate research questions based on existing knowledge gaps. 2. Understand and apply various research methodologies and ethics in psychology to design and collect data 3. Apply critical analysis to interpret and discuss research results. 4. Present research findings in the APA format in an organized and coherent manner. 	
		No. of Hours
Content:	<p>This course is designed for students pursuing a BA in Psychology to develop advanced research skills and apply psychological principles in the completion of a research-based project. Emphasis will be placed on critical thinking, literature review, research design, data analysis, and effective communication of findings.</p> <p>Students would be required to adhere to the latest APA style guidelines of report writing, which would include:</p> <ol style="list-style-type: none"> 1. Preliminaries: <ol style="list-style-type: none"> a. Title Page: Title, author's name, institutional affiliation, guide name, and year. b. Declaration page signed by the students c. Certificate page signed by the supervisor d. Acknowledgement e. Abstract: Concise summary of the research (150-250 words) with 5 – 7 keywords f. Table of contents g. List of tables h. List of figures 2. Introduction: Background and relevance. 3. Literature Review: Comprehensive review of relevant literature. 4. Research methodology: Research questions, hypotheses, sample design/techniques, description and psychometric properties of measures/tools used, data collection procedure and data analysis. 	60

	<p>5. Results and Discussion: Presentation of findings and interpretation of results.</p> <p>7. Conclusion: Summary of key findings, limitations, suggestions for future research and implications.</p> <p>8. References: Alphabetical list of all sources (APA format) cited in the report/study.</p> <p>9. Appendices: Measures and/or additional materials.</p> <p>*To ensure uniformity in the reports it was decided to follow the following pattern for presentation :</p> <ul style="list-style-type: none"> The main body of the project report should be divided into 3 chapters: <p>1st chapter: Introduction and literature review; (30% weightage)</p> <p>2nd chapter: Research methodology and results and discussion(60% weightage)</p> <p>3rd chapter : Conclusion(10 %)</p> <ul style="list-style-type: none"> This main body should be a minimum of 30 pages and not exceeding 60 <p>(students should be encouraged to either read their findings at seminars, and conferences or get them published)</p>	
Pedagogy:	<ol style="list-style-type: none"> 1. Problem Formulation: The project guide will assist students in formulating a clear and focused research question or statement that aligns with their interests and contributes to the existing knowledge in psychology. 2. Research Methodology Training: The project guide will ensure students understand various research designs, and ethical considerations relevant to their chosen topics. 3. Effective Communication: The project guide will assist and guide students to articulate their ideas clearly in the final project including writing using APA style. 	
References/ Readings	American Psychological Association. (2020). <i>Publication manual of the American Psychological Association</i> (7th ed.). Washington, DC: American Psychological Association. (Or the latest APA manual)	
Course Outcomes:	<p>Upon successful completion of this course, students will be able to:</p> <ol style="list-style-type: none"> 1. Demonstrate research competence through conducting a thorough literature review, designing and implementing a research project; 2. Apply knowledge through analyzing and interpreting data using appropriate qualitative, quantitative or mixed techniques; 3. Effectively communicate research findings utilizing APA style for formatting and citation and 4. Recognize ethical considerations in psychological research. 	

Name of the Programme : BA PSYCHOLOGY
Course Code : PSY 322
Title of the Course : EDUCATIONAL PSYCHOLOGY
Number of Credits : 04
Effective from AY : 2024-25

Pre-requisites for the Course:	Students are expected to have fulfilled the basic psychology course requirements in preceding semesters, alongside meeting the standard criteria for obtaining a BA degree	
Course Objectives:	<ol style="list-style-type: none"> 1. Develop an understanding of the fundamental aspects of educational psychology and, the key components of effective teaching. 2. Evaluate the significance of instructional planning and effective planning in education. 3. Investigate the impact of technology impact on education and explore strategies for meeting diverse needs. 4. Acquire skills in classroom management and structuring small-group activities. 5. Assess the challenges faced by students with achievement problems and the role of the classroom in educational assessment and performance evaluation. 	
		No. of Hours
Content:	CHAPTER I: EDUCATIONAL PSYCHOLOGY: A TOOL FOR EFFECTIVE TEACHING <ol style="list-style-type: none"> 1. Educational Psychology: Nature, Aspects, and Scope 2. Exploring Educational Psychology: Historical Background, Teaching: Art and Science 3. Learning and Teaching today and the Role of Educational Psychology 4. Effective Teaching: Professional Knowledge and Skills; Commitment, Motivation, and Caring 5. Multicultural Education 	15
	CHAPTER 11: PLANNING, INSTRUCTION, AND TECHNOLOGY <ol style="list-style-type: none"> 1. Instructional Planning, Time Frames and Planning 2. Teacher-Centred Lesson Planning and Instruction 3. Learner-Centred Lesson Planning and Instruction 4. Technology and Education Teaching 5. Education for Exceptional Learners 	15
	CHAPTER 111: TEACHING, LEARNING AND MANAGING THE CLASSROOM <ol style="list-style-type: none"> 1. Teachers and Peers as Joint Contributors to Student Learning 2. Structuring Small - Group Work 3. Learning and Thinking Styles 4. Effective Classroom Management 	15

	5. Dealing with Problem Behaviours	
	CHAPTER 1V: MOTIVATION, ACHIEVEMENT AND EDUCATIONAL PERFORMANCE 1. Exploring Motivation 2. Achievement Processes 3. Motivation, Relationships and Socio-cultural Contexts 4. Students with Achievement Problems 5. The Classroom as an Assessment Context (students should be taken on a field trip to visit counselling centers and child guidance clinics)	15
Pedagogy:	1. A blend of traditional teaching techniques- lecturing and problem-based learning may be used in the classroom. 2. The ideas addressed in this course can be better explored through experiential learning tools such as group discussions, role-play, debates, flipped learning demonstrations and sharing of experiences, among others, during lectures. 3. Facilitators are also encouraged to use ICT tools such as PowerPoint Presentations/ Ted talks/ documentaries to facilitate engagement with syllabus topics.	
References/ Readings	Books: 1. Woolfolk A. (2018). Educational Psychology (14th Ed.). Pearson. 2. Santrock J.W. (2017). Educational Psychology (6th Ed.). McGraw Hill Higher Education. 3. Aggarwal J. C. (2014). Essentials of Educational Psychology. New Delhi: Shipra Publishers. 4. Chatterjee S. K. (2000) Advanced Educational Psychology. New Delhi: Books & Allied Private Limited. 5. Mangal S. K. (2004). Educational Psychology. Tandon Publishers: Ludhiana 6. Slavin, R. (2012). Educational psychology: Theory and practice, (10th Ed.). Boston: Allyn and Bacon.	
Course Outcomes:	At the end of this course, the learner will be able to: 1. Demonstrate a thorough understanding of the fundamental aspects of educational psychology and identify key components of effective teaching; 2. Evaluate the significance of instructional planning and demonstrate competence in effective planning strategies; 3. Explore strategies for collaborative learning and meeting diverse needs; 4. Demonstrate skills in classroom management and small-group structuring, adapting to diverse learning and thinking styles and 5. Assess challenges faced by students with achievement problems, and develop competence in addressing diverse student needs.	

Semester VII**Name of the Programme : BA PSYCHOLOGY****Course code : PSY-400****Title of the Course : PSYCHOMETRICS****Number of Credits : 04****Effective from AY : 2024-25**

Pre-requisites for the course	Students are expected to have fulfilled the basic psychology course requirements in preceding semesters, alongside meeting the standard criteria for obtaining a BA degree	
Course Objectives:	<ol style="list-style-type: none"> 1. To familiarize students with psychometric concepts, theory and principles of test construction. 2. To understand the application and contextual interpretation of data from psychological measurement. 	
		No. of Hours
Content:	CHAPTER I: THEORETICAL - CONCEPTUAL ORIENTATION <ol style="list-style-type: none"> 1. The development of psychometrics: The history of psychometrics, psychometrics today. 2. Test development: The process of test construction, constructing your own questionnaire. 3. Psychometric properties: Item analysis, reliability, validity, standardisation and normalisation. 4. Ethical considerations and future of psychometrics: Issues in intelligence testing, ethical test use and integrity testing, psychometrics in the information technology age. 	15
	CHAPTER II: INTELLIGENCE, APTITUDE, PERSONALITY AND NEURO-PSYCHOLOGICAL TESTING <ol style="list-style-type: none"> 1. Intelligence: Measurement of Intelligence - Wechsler Intelligence Scales, Ravens Progressive Matrices 2. Aptitude: Measurement of Aptitude – David's Battery of Differential Abilities (DBDA), Scholastic Aptitude Test 3. Personality: Measurement of Personality-NEO PI-R, MMPI-2 Neuropsychology: Neuropsychological Assessment-The Luria-Nebraska Neuropsychological Battery, Screening for alcohol use disorders.	15
	CHAPTER III: PROJECTIVE TESTING <ol style="list-style-type: none"> 1. Classification of personality tests 2. Inkblot Tests: Rorschach test, Alternative inkblot tests- Holtzman inkblot 3. Apperception Tests: Thematic Apperception Test, Alternative apperception procedures- CAT 4. Non-pictorial Projective procedures: word association test, sentence completion test 	15

	CHAPTER IV: PSYCHOMETRIC APPLICATIONS <ol style="list-style-type: none"> Using psychometrics in clinical psychology: Identifying specific learning disabilities Using psychometrics in educational settings: Measuring ability and achievement in school children Testing special population: Infant and Preschool assessment Psychometric assessment of personality in occupational settings: The big Five model, Orpheus, The Orpheus scales 	15
Pedagogy	<ol style="list-style-type: none"> The teaching –learning techniques used in the classroom can include lectures, tutorials, presentations, reading, individual and group experiential learning activities like diary writing, personal reflections, classroom discussions, presentations and sharing of experiences from social context. The ideas addressed in this course can be better explored through the use of ICT and mass media and web based sources like documentaries, Ted talks, films etc. tools to facilitate engagement with topics in the syllabus and to make the teaching-learning process interactive, interesting and fruitful. 	
Books for Reference	<ol style="list-style-type: none"> Rust, J. & Golombok. (2020). Modern psychometrics: The science of psychological assessment, (4th ed.). New York: Psychology press. Cohen, J.R., Swerdlik, M. E. & Kumthekar, M.M. (2017). Psychological testing and assessment: An introduction to tests and measurement. (9th ed.). New York. W-Hill International edition Anastasi, A. & Urbana, S. (2016). Psychological testing. (7th ed.). Delhi: Pearson Education Pvt. Ltd. Gregory, R. J. (2017). Psychological Testing: History, principles and applications. (7th ed.). New Delhi: Pearson Education Kaplan, R. M., & Saccuzzo, D. P. (2018). Course Outcomes	<p>At the end of the course the student will be able to:</p> <ol style="list-style-type: none"> 1. Evaluate the nature and etiology of maladaptive behavior; 2. Classify symptoms of psychological disorders as per DSM V categorization; 3. Correlate the clinical presentation of the psychological disorders and 4. Examine and apply treatment modalities suitable for the psychological disorders. 	

Name of the Programme : BA PSYCHOLOGY
Course code : PSY-403
Title of the Course : COUNSELING ACROSS LIFE SPAN
Number of Credits : 04
Effective from AY : 2024-25

Pre-requisites for the course	Students are expected to have fulfilled the basic psychology course requirements in preceding semesters, alongside meeting the standard criteria for obtaining a BA degree	
Course Objectives:	1. To develop an understanding of specific concerns associated with each stage of the lifespan. 2. To apply knowledge of specific concerns in each stage to design suitable preventive and treatment strategies. 3. To understand the importance of health promotion for numerous contexts over the lifespan	
		No. of Hours
Content:	Chapter 1 - COUNSELLING CHILDREN 1. Child identity development 2. Fostering resilience in children experiencing developmental disruptions 3. Promoting healthy and effective relationships among school-aged children 4. Psychosocial adjustment of children with chronic illness	15
	Chapter II - COUNSELLING ADOLESCENTS 1. Promoting healthy lifestyles 2. Positive identity development among adolescents 3. Fostering adolescent work and career readiness 4. Health disparities and help-seeking behaviour among adolescents	15
	Chapter 111: COUNSELLING ADULTS 1. Young adulthood: Promoting healthy relationships, treating behavioural health challenges, positive parenting and child rearing 2. Middle adulthood: Role strain and conflict, supporting adaptation to new family roles, promoting positive career change in midlife.	15
	Chapter IV: - GERIATRIC COUNSELLING 1. A positive aging framework for counselling older adults 2. Psychosocial crisis and emotional impact of chronic illness and disability 3. Facilitating transitions through retirement 4. Working therapeutically with older adults	15

Pedagogy	<ol style="list-style-type: none"> 1. The teaching–learning techniques used in the classroom can include lectures, tutorials, presentations, reading, and individual and group activities with discussions. 2. Blended Learning, Flipped Classroom & Crossover learning
Books for Reference	<ol style="list-style-type: none"> 1. Capuzzi, D. (2016). Human growth and development across the lifespan: Applications for counselors. John Wiley & Sons. 2. Juntunen, C. (2020). <i>Counseling individuals through the lifespan</i>. Sage Publications.
Course Outcomes	<p>At the end of this course, the learner will be able to:</p> <ol style="list-style-type: none"> 1. Identify specific concerns and problems at the various stages of human development; 2. Design effective strategies to deal with specific concerns and conflicts experienced at various stages across the lifespan; 3. Formulate developmentally appropriate counselling strategies and interventions to facilitate optimal health and 4. Apply the developmental concepts, theories and specific Evidence-based research findings to practical settings

Name of the Programme : BA PSYCHOLOGY
Course code : PSY-411
Title of the Course : APPLIED POSITIVE PSYCHOLOGY
Number of Credits : 04
Effective from AY : 2024-25

Pre-requisites for the course	Students are expected to have fulfilled the basic psychology course requirements in preceding semesters, alongside meeting the standard criteria for obtaining a BA degree	
Course Objectives:	Course Objectives: 1. To understand the fundamental concepts of positive psychology. 2. To examine established areas of positive psychology. 3. To apply positive psychological interventions.	
		No. of Hours
Content:	CHAPTER I: – INTRODUCTION TO POSITIVE PSYCHOLOGY 1. Positive psychology: Meaning, nature, Core theories and concepts, importance 2. The relationship between counseling psychology and positive psychology 3. General guidelines for developing positive psychological treatment plans 4. Challenges associated with implementing positive psychological interventions	15
	CHAPTER II: - INTERVENTIONS IN POSITIVE PSYCHOLOGY 1. Gratitude interventions: Interventions to increase gratitude in children, adolescents and adults 2. Positive psychological interventions for promoting forgiveness: Efficacious components of forgiveness interventions, unresolved questions about forgiveness interventions Empathy-related interventions	15
	CHAPTER III: INTERVENTIONS IN POSITIVE PSYCHOLOGY - 1. Creativity as a target and tool for positive interventions: Creativity as a tool for increasing well-being, building creativity-based positive interventions 2. Patience interventions to improve well-being: Defining and discriminating patience, possible applications of patience interventions 3. Positive family therapy interventions: Systems theory, positive family therapy, interventions in positive family therapy	15
	CHAPTER IV: POSITIVE PSYCHOLOGY APPLICATION AMONG INDIVIDUALS, SPECIFIC POPULATIONS AND CONTEXTS 1. Applications of Positive Psychology to Individual Therapy.	15

	<p>2. Interventions across populations: Positive psychology for children, Clinical populations, chronic illnesses, substance abuse.</p> <p>3. Interventions across contexts: Workplace, classroom, rehabilitation, community</p> <p>Other Areas of Application: Online positive psychological interventions, social identity interventions, posttraumatic growth, resilience.</p>	
Pedagogy	<p>1. The teaching–learning techniques used in the classroom can include lectures, tutorials, presentations, reading, individual and group experiential learning activities like diary writing, personal reflections, classroom discussions, presentations, and sharing of experiences from social context.</p> <p>2. New Delhi: Cengage Learning.
Course outcomes	<p>At the end of this course, the learner will be able to:</p> <ol style="list-style-type: none"> 1. Appreciate the value of various personality systems; 2. Understand the theoretical frameworks of personality development; 3. Compare and critically analyse various theories of personality and 4. Apply the knowledge gained to various case situations

Name of the Programme : BA PSYCHOLOGY
Course code : PSY-405
Title of the Course : Supervised Practicum
Number of Credits : 04
Effective from AY : 2024-25

Pre-requisites for the course	Students are expected to have fulfilled the basic psychology course requirements in preceding semesters, alongside meeting the standard criteria for obtaining a BA degree	
Course Objectives:	<ol style="list-style-type: none"> 1. To understand techniques of assessment and report writing in mental health settings. 2. To develop knowledge to administer and interpret psychological assessment tools. 3. To develop planning and organization skills through interactive and experiential learning. 4. To analyze case studies for problem identification and management plan. 	
Content:		No. of Hours
	CHAPTER I – THERAPEUTIC INTERVENTION: OVERVIEW <ol style="list-style-type: none"> 1. Rapport building and understanding client distress <ul style="list-style-type: none"> • Taking a case history, conducting Mental Status Examination, 2. Learning Disability Screening <ul style="list-style-type: none"> • NIMHANS (SLD) Battery, Wechsler Individual Achievement Test (WIAT) III 3. Formulating and executing the intervention plan 4. Case analysis and Case conferences <p>Assessment will be conducted through simulated role-play exercises, movie reviews, group discussions</p>	15
	CHAPTER II – OBSERVATION AND COMMUNITY OUTREACH <ol style="list-style-type: none"> 1. Observation in various field settings: NGOs, schools, private practitioner clinics, companies and industrial/corporate organizations. <p>Observation log book to be maintained.</p> <ol style="list-style-type: none"> 2. Organizing and conducting workshops for specific target groups (adolescents, parents, educators, employees etc.) to promote awareness and engage in psycho-education on critical psychological issues 	15
	CHAPTER III - CLIENT INTERACTION AND CASE WRITING <p>6 cases to be assessed: Child – 01, Adolescents – 01, Adults – 02, Geriatric – 01, Special Case-01</p>	30

	<p>(Special case: individuals with any specific pathology e.g. Learning Disability, ADHD, Eating Disorder, Depression)</p> <p>The student has to maintain a journal to include the following: Detailed Case history, Mental Status Examination, testing rationale with basic test details, test interpretation, points to consider, suggested interventions, and prognosis.</p> <p>Every 15 students will be supervised by one teacher.</p>	
Pedagogy	<ol style="list-style-type: none"> 1. The teaching–learning techniques used in the classroom can include lectures, tutorials, presentations, reading, and individual and group activities with discussions. 2. Use of Psychological Assessment tools, and placements of students in various community centers, mental health facilities, geriatric facilities, and educational institutions to obtain case data. 	
Books for Reference	-----	
Course Outcomes	<p>At the end of this course, the learner will be able to:</p> <ol style="list-style-type: none"> 1. Examine case studies for problem identification And management plan; 2. Administer and interpret psychological assessment tools to Target groups; 3. Demonstrate planning and organization skills by conducting Workshops on selected topics related to mental health and 4. Apply appropriate treatment goals in collaboration with the Client. 	

Name of the Programme : BA PSYCHOLOGY
Course code : PSY-406
Title of the Course : PSYCHOTHERAPIES
Number of Credits : 04
Effective from AY : 2024-25

Pre-requisites for the course	Students are expected to have fulfilled the basic psychology course requirements in preceding semesters, alongside meeting the standard criteria for obtaining a BA degree	
Course Objectives:	1. To understand the therapeutic approaches available in the treatment of psychological disorder 2. To examine the intervention techniques as postulated by the therapeutic approaches. 3. To develop knowledge of the application of various psychotherapeutic techniques in varied techniques	
Content:		No. of Hours
	CHAPTER I PSYCHOTHERAPY: ANALYTICAL APPROACHES 1. Counselling theory, competency and treatment Planning 2. Psychoanalysis 3. Transactional analysis	15
	CHAPTER II PSYCHOTHERAPY: HUMANISTIC-EXISTENTIAL APPROACHES 1. Person centered counselling and psychotherapy 2. Existential counselling and psychotherapy 3. Gestalt counselling and psychotherapy	15
	CHAPTER III – PSYCHOTHERAPY: ACTION-ORIENTED APPROACHES 1. Behaviour therapy 2. Cognitive –behaviour therapy 3. Rational Emotive behaviour therapy 4. Evidence-based cognitive behavioural approaches: dialectical behaviour therapy and Trauma focused cognitive behavioural therapy	15
	IV – PSYCHOTHERAPY: POST MODERN APPROACHES 1. Solution-based approach 2. Narrative and Collaborative approaches 3. Feminist and multicultural counselling and psychotherapy NOTE: All the therapies will cover the following: <ul style="list-style-type: none"> • Concepts • Overview of the counseling process • Counselling relationship • Goal setting • Interventions and special concerns in therapy 	15

Pedagogy:	<ol style="list-style-type: none"> 1. The teaching–learning techniques used in the classroom can include lectures, tutorials, presentations, reading, individual and group experiential learning activities like diary writing, personal reflections, classroom discussions, presentations, and sharing of experiences from social context. 2. Course Outcomes	<p>At the end of this course, the student will be able to:</p> <ol style="list-style-type: none"> 1. Understand the concepts, nature, scope, theories, models, and ethical concerns in psychosocial rehabilitation; 2. Apply skills and intervention strategies within the context of comprehensive rehabilitation treatment planning; 3. Analyze assessment strategies and the importance of client engagement in the recovery-focused therapeutic relationship and rehabilitation plan and 4. Synthesize and formulate a rehabilitation treatment plan that aims at reconnecting/integrating clients into the community through Life care planning and community support systems. 	

Name of the Programme : BA PSYCHOLOGY
Course code : PSY-412
Title of the Course : NEUROPSYCHOLOGY
Number of Credits : 04
Effective from AY : 2024-25

Pre-requisites for the course	Students are expected to have fulfilled the basic psychology course requirements in preceding semesters, alongside meeting the standard criteria for obtaining a BA degree	
Course Objectives:	1. To understand the structure and functions of the nervous system. 2. To highlight the link between behavior, mental processes and biological processes. 3. To understand the application of cognitive and biological foundations in clinical practice.	
		No. of Hours
Content:	CHAPTER I – FOUNDATIONS OF BIOPSYCHOLOGY & NEUROPSYCHOLOGY 1. Structure and Functions of the Nervous System: The Central Nervous System, The Peripheral Nervous System, 2. Communication in the Nervous System: Cells of the Nervous System, How neurons communicate. 3. The Visual System 4. Audition, The Body Senses and Chemical Senses	15
	CHAPTER II - NEURO-PSYCHOLOGICAL BASIS OF BEHAVIOR 1. Learning, Language and Memory: The nature of learning, Learning and synaptic plasticity; Cortical localization of language, The Wernicke-Geschwind model; Relational learning Human anterograde amnesia, spared learning abilities, declarative and non- declarative memory 2. Emotions: Emotions as response patterns; Facial expression of emotions; Neural basis of the communication of Emotions - Recognition and Expression 3. Sexual and reproductive behavior: Hormonal control of Sexual behavior, Neural mechanisms in sexual behavior 4. Sleep and Biological Rhythms: A physiological and behavioral description of sleep, Physiological mechanisms of sleep and waking.	15
	CHAPTER III– NEUROPLASTICITY 1. Phases of neural development: Induction of the neural plate, Neural proliferation, migration and aggregation, axon growth and synapse formation, neuron death and Synapse rearrangement.	15

	<ol style="list-style-type: none"> Causes of brain damage: Brain tumors, Cerebrovascular disorders, Closed head injuries, Infections of the brain, Neurotoxins, Genetic factors, Programmed cell death Responses to Nervous system damage: Neural degeneration, Neural regeneration and Neural reorganization Neuroplasticity and the treatment of CNS damage: Promotion of recovery from CNS damage by rehabilitative training, Genetic engineering, Neurotransplantation. 	
	CHAPTER IV. NEUROPSYCHOLOGICAL BASIS OF SPECIFIC DISORDERS <ol style="list-style-type: none"> Degenerative Disorders Schizophrenia and Major Affective Disorders Autism and ADHD Stress Disorders 	15
Pedagogy	<ol style="list-style-type: none"> The teaching–learning techniques used in the classroom can include lectures, tutorials, presentations, reading, individual and group experiential learning activities like diary writing, personal reflections, classroom discussions, presentations, and sharing of experiences from social context. The ideas addressed in this course can be better explored through the use of ICT and mass media and web-based sources like documentaries, TED talks, films, etc. tools to facilitate engagement with topics in the syllabus and to make the teaching-learning process interactive, interesting, and fruitful. 	
Books for Reference	<ol style="list-style-type: none"> Carlson, N. R. (2007). Foundations of physiological psychology. (7th ed.). New Delhi: Pearson Education.
